Our Story

Welcome to KPMG Executive Education. A different school of thought. Designed to meet a world of different needs.

While emerging and complex accounting and regulatory changes are driving the need for enhanced skills, the world and business are also moving at a speed we never thought possible. And if companies and people don't keep up, it will become almost impossible to catch up.

We make it easy for management to help employees strengthen their skills and keep up with CPE requirements. Our custom learning portal is personalized to your organization and provides easy access to an extensive list of digital self-studies on technical accounting and finance topics detailed in this catalog. A cost-effective way to close learning gaps, the portal allows you to assign courses and track your team's completion.

Developed and taught by KPMG subject matter professionals and leading practitioners from academia and business, all courses are mobile-friendly and nearly all are CPE-eligible. New courses are added on a regular basis.

We've helped numerous FORTUNE 100, middle-market, and global companies strengthen their staff and secure their future over the past 25+ years. Let us help you stay ahead of industry changes with relevant, timely training that addresses today's needs and tomorrow's demands.

We look forward to helping you, your employees, and your company look ahead and thrive.

Stacey L. Tolpa
Managing Director, Executive Education

Accounting

2016 FASB Updates to Revenue Recognition **New!**

23-WB-262-CL

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

Paul Munter, PhD, CPA, reviews ASU 2014-09 on revenue recognition, as well as the recent updates to that guidance provided by the FASB. The updates in ASU 2016-08 (gross versus net), ASU 2016-10 (performance obligations and licensing), and ASU 2016-12 (targeted improvements and practical expedients) are all included and the impact of those updates on the initial guidance is considered. Other than the guidance covered within this program, no additional major changes are expected related to recognition and measurement prior to the effective date of the Topic 606 on revenue recognition.

By the end of this course, participants should be able to:

- identify the core principle and the model used
- identify the effective date for the initial and additional guidance on revenue recognition
- identify the changes to the guidance.

Accounting Alternatives for PPP Loans

23-WB-233-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

In this course, Russ Madray, CPA examines different models to account for loans administered under the PPP Program resulting from legislation associated with the CARES Act and the Economic Aid Act. While the debt model under ASC 470 applies to all types of entities, there are other accounting models that may be used by entities depending on the facts and circumstances. These models include the gain contingency model, an NFP model, and the IAS 20 model. This course is well suited for practitioners at all levels and for whom PPP loans and loan forgiveness are of interest. It does not cover the legal or tax implications associated with these loans or their forgiveness. Neither does it address loan application or forgiveness.

By the end of this course, participants should be able to:

- identify different models to account for loans issued under the PPP program
- determine the financial statement impacts of accounting for these loans under the different models.

Accounting Basics

23-WB-261-CL

Field Of Study: Accounting

CPE Credits: 6.00

Level of Knowledge: Overview

This course introduces accounting for business at a remedial level for currently practicing accountants or for the professional with aspiration to become more versed in accounting basics. Included in this presentation is instruction on analyzing transactions, the matching and adjustment process, the accounting cycle, inventories, fixed assets, intangible assets, the Statement of Cash Flows, financial statement analysis, managerial accounting, cost accounting budgeting and capital investment analysis. This overview level course provides a general review of accounting from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- recognize basic accounting and business terms
- determine how to analyze transactions
- identify the matching and adjustment process
- recall the accounting cycle
- recognize the accounting for inventories, fixed assets, and intangible assets
- identify the elements of the Statement of Cash Flows
- determine how to analyze financial statements
- recognize managerial accounting and cost accounting
- recall different budgeting systems, and
- identify capital investment analysis.

Accounting Changes and Error Corrections

20-WB-110-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

KPMG professionals discuss how to identify, account for and present the different types of accounting changes and error corrections.

Topics include:

- accounting changes
- error corrections
- interim reporting
- SEC registrants.

By the end of this course, participants should be able to:

- recall how to identify, account for and present accounting changes and error corrections.

Accounting for Company Generated Tax Credits

23-WB-112-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this course, KPMG professionals discuss the accounting for tax credits generated by a company through participation in qualifying activities or ownership of qualifying property. Topics include:

- refundable tax credits
- transferable tax credits
- nonrefundable, nontransferable tax credits.

By the end of this course, participants should be able to:

- recall the accounting for tax credits generated through an entity's participation in activities or ownership of qualifying property.

Note: This course is based on a live webcast that took place on June 8, 2023.

Accounting

Accounting for Contingencies **New!**

23-WB-268-CL

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA discusses FASB guidance on accounting for contingencies, the differences between estimates and contingencies, and when to accrue for gains or losses.

By the end of this course, participants should be able to:

- identify where the authoritative guidance is found on uncertainties and contingencies and how to apply it
- identify the relationship between uncertainties, estimates, and contingencies
- define a contingency
- identify the steps and how to recognize a contingency

Accounting for Contingencies and Guarantees

20-WB-218

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course introduces both loss and gain contingencies, and the proper accounting on the financial statements under ASC 450. The accounting for guarantees in ASC 460 is also reviewed in addition to commitments, and disclosure requirements.

By the end of this course, participants should be able to:

- determine if a loss contingency exists and if it should be accrued and/or disclosed based on the guidance in ASC 450
- recall the accounting and presentation requirements for gain contingencies
- determine the initial and subsequent accounting requirements for guarantees under ASC 460
- identify common disclosures related to gain and loss contingencies, guarantees and commitments.

Accounting for Convertible Debt and Contracts on an Entity's Own Equity

19-WB-106-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

KPMG professionals discuss accounting for convertible debt under ASC 470-20 and contracts on an entity's own equity under ASC 815-40.

Overviews of:

- accounting for convertible debt under current U.S. GAAP
- accounting for contracts on an entity's own equity under current U.S. GAAP
- expected FASB proposals on the accounting for these instruments.

By the end of this course, participants should be able to:

- identify the requirements of accounting for convertible debt and contracts on an
- entity's own equity
- identify the FASB's plans to propose changes to the accounting for these instruments.

Accounting for Debt Arrangements Under ASC 470-10

19-WB-110-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

KPMG professionals discuss debt issuance, including:

- accounting treatment of discounts, or premiums, and issuance costs
- subsequent measurement
- classification framework for debt arrangements
- impact of callable provisions or covenants
- post-balance-sheet refinancing activities
- distinguishing debt from equity considerations.

The FASB's exposure draft of proposed changes to ASC 470 will potentially impact the analysis of debt as current versus noncurrent.

By the end of this course, participants should be able to:

- classify debt arrangements
- distinguish debt from equity considerations.

Accounting for Debt Modifications

19-WB-111-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course is designed to provide participants with an overview of accounting for debt modifications. Topics include:

- troubled debt restructurings
- accounting for term debt modifications
- accounting for line-of-credit modifications.

By the end of this course, participants should be able to:

- identify the accounting for debt and line-of-credit modifications.

Accounting for Foreign Currency Matters

18-WB-109-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

This course provides an overview of the accounting for transactions denominated in a foreign currency as well as operations in a foreign currency environment including highly inflationary economies. The objectives of ASC 830 will be covered as will hedging exposure and select U.S. GAAP v. IFRS differences.

By the end of this course, participants should be able to:

- identify how to apply the guidance of ASC 830.

Accounting

Accounting for Intangible Assets

20-WB-219

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course introduces the accounting guidance under ASC 350 for various different types of intangible assets, such as goodwill, intangible assets other than goodwill, internal-use software and website development costs. It also introduces the presentation and disclosure requirements associated with these types of assets, in the period of acquisition and in subsequent periods.

By the end of this course, participants should be able to:

- distinguish intangible assets acquired in a business combination that should be recognized separately from goodwill
- compute the amount that should be recognized for intangible assets acquired other than in a business combination
- recall the accounting for costs associated with internally developed intangible assets
- apply the accounting for software costs, depending on the stage of development
- determine the subsequent measurement accounting for intangible assets
- recall the disclosure requirements related to intangible assets and goodwill.

Accounting for Leases **New!**

23-WB-264-CL

Field Of Study: Accounting

CPE Credits: 5.00

Level of Knowledge: Intermediate

Finance leases, operating leases, lessee accounting, lessor accounting, lease classification. No matter what area of lease accounting you are involved with under FASB ASC 842, this course offers expert guidance and instruction. A special section includes detailed presentation of accounting and reporting by lessees and lessors. This intermediate level course is most appropriate for the professional with detailed knowledge in accounting for leases who may be at a mid level position within an organization with operational or supervisory responsibilities, or both.

By the end of this course, participants should be able to:

- identify basic concepts in lease accounting
- demonstrate accounting and reporting by lessees and lessors
- account for sale-leaseback

Accounting for Partnerships

23-WB-234-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA reviews the accounting for partnerships including the bonus and goodwill methods.

By the end of this course, participants should be able to:

- identify how partnerships are similar to other entities
- identify where the guidance on partnership formation and liquidation is found
- identify the accounting methods used in adding and removing partners from a partnership.

Accounting for Share-Based Compensation

22-WB-133-TR

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Intermediate

Share-based compensation can get tricky. Master all the nuances with this up-to-date study program. Coverage includes employee share purchase plans, tax consequences of equity instruments, accounting for fixed share options, and much more. As an intermediate level course, this course is most beneficial for the professional with a detailed knowledge in accounting for share-based compensation and/or experience at a mid-level position within an organization with operational or supervisory responsibilities, or both.

By the end of this course, participants should be able to:

- describe fair value accounting and option-pricing models
- discuss measurement and recognition of compensation cost
- summarize settlements of awards and tax issues
- describe EPS implications and required disclosures.

Accounting for Treasury Stock

23-WB-235-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA, CGFM discusses accounting for treasury stock, the MBICA, and the legality of treasury stock, which is coming up in peer reviews.

By the end of this course, participants should be able to:

- identify the location and methods of FASB guidance
- identify when treasury stock was eliminated in some states

Accounting Overview for Tax Professionals

23-WB-200-TR

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Basic

This course provides the tax professional with an overview of GAAP and the GAAP standard setting bodies. Also, it provides an introduction to Compilations and Reviews, including the requirements of AR-C 80 and AR-C 90. This basic level course is most beneficial to professionals new to GAAP who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- identify key standard setting bodies and elements of GAAP, the Codification, and basic financial statements
- recognize the procedures an accountant should perform as part of a compilation engagement and professional requirements that must be met
- identify the procedures an accountant should perform as part of a review engagement and professional requirements that must be met
- determine practice issues and the basic provisions of the quality control and peer review standards for compilation and review engagements.

Accounting

Advanced Fair Value Measurement Issues

19-WB-102

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Advanced

Fair value measurement is one of the most common, and yet complex, issues in financial accounting and reporting.

This course addresses the more advanced fair value issues within ASC 820 and covers:

- active, inactive, and not orderly markets
- using net asset value (NAV) per share as a practical expedient to measuring fair value
- fair value considerations for liabilities
- advanced issues applicable to the fair value hierarchy.

By the end of this course, participants should be able to:

- identify the fair value considerations when transactions take place in active, inactive, and not orderly markets
- recall when net asset value (NAV) per share can be used as a practical expedient to measure fair value
- recognize the additional considerations when determining the fair value of liabilities.

This course is the second of two that make up the Fair Value Measurement series.

“Overview of ASC Topic 820 Fair Value Measurement” covers key concepts of ASC 820 and provides an overview of the accounting and reporting requirements for fair value measurements.

Advanced Fair Value: Valuation Approaches, Hierarchy and Disclosures

New!

23-WB-308

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

Fair value measurement is one of the most common, and yet complex, issues in financial accounting and reporting. This course addresses the more advanced fair value issues within ASC 820 and covers:

- determining the fair value of assets and liabilities, including inputs and valuation techniques
- classifying fair value measurements within the fair value hierarchy.

By the end of this course, participants should be able to:

- recall the general principles for using valuation approaches under ASC 820
- recognize the key elements of each of the three valuation approaches detailed in ASC 820
- distinguish when one valuation approach may be more indicative of fair value as defined in ASC 820 than another valuation approach
- recall other considerations that are critical to ensuring the valuation approach is applied consistently with the guidance in ASC 820
- identify the appropriate level within the fair value hierarchy for common fair value measurements.

Note: For additional technical and/or regulatory updates, please subscribe to Financial Reporting View for the latest insights.

Advanced Income Tax Issues under ASC Topic 740

19-WB-104

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Advanced

ASC 740 applies to all domestic and foreign entities preparing U.S. GAAP financial statements, including not-for-profit entities with activities that are subject to income taxes. It covers the financial accounting and reporting of income taxes that result from an entity's activities during the current and preceding years.

By the end of this course, participants should be able to recall the five-step process for accounting for deferred taxes, including:

- identify temporary differences and separate them into future taxable and future deductible amounts
- recall how to compute deferred tax assets/liabilities using an appropriate tax rate
- recognize when a valuation allowance needs to be recorded related to deferred tax assets.

This course is the second of three that make up the Income Taxes series:

“Overview of ASC Topic 740 Income Taxes” will provide an overview of the principles and accounting of income taxes under ASC 740.

“Advanced Income Tax Issues: Uncertainty in Income Taxes” will cover accounting for uncertainty in income taxes.

Advanced Income Tax Issues: Uncertainty in Income Taxes

19-WB-105

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Advanced

Accounting for income taxes, including uncertainty in income taxes, involves estimates and can be subject to bias. This uncertainty must be taken into consideration in the financial statements under the guidance of ASC 740. This guidance is widely applicable, causing uncertainty in income taxes to be a consideration for almost all entities, even those that are not subject to income tax.

By the end of this course, participants should be able to:

- identify uncertainty in income tax positions
- recall the recognition and measurement guidance for recording a liability on unrecognized tax benefits
- describe the disclosure requirements for unrecognized tax benefits.

This course is the third of three that make up the Income Taxes series:

“Overview of ASC Topic 740 Income Taxes” will provide an overview of the principles and accounting of income taxes under ASC 740.

“Advanced Income Tax Issues Under ASC Topic 740” will provide a more in-depth look at the aspects of ASC 740 and the calculation of an income tax provision.

AICPA Draft Accounting and Valuation Guide for Venture Capital and Private Equity Funds and Other Investment Companies

18-WB-110-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Overview

KPMG's Sean McKee was the Co-Chair of the AICPA Task Force responsible for drafting the AICPA's Valuation of Portfolio Company Investments of Venture Capital and Private Equity Funds and Other Investment Companies accounting and valuation guide (the Guide).

During this course, he reviews the changes in accounting results from the Guide, valuation techniques and inputs for level 3 investments and the concept of calibration and its importance in fair valuation.

By the end of the course, participants should be able to:

- recall the content of the working draft of the AICPA Accounting and Valuation Guide titled “Valuation of Portfolio Company Investments of Venture Capital and Private Equity Funds and Other Investment Companies.”

Accounting

Asset Retirement Obligations

19-WB-201

Field Of Study: Accounting

CPE Credits: 0.50

Level of Knowledge: Intermediate

This course covers the accounting for asset retirement obligations (AROs) in accordance with ASC Topic 410: Asset Retirement and Environmental Obligations, specifically the initial and subsequent measurement of AROs, distinguishing between an ARO and an environmental obligation, and the accounting requirements of AROs.

By the end of this course, participants should be able to:

- distinguish between an asset retirement obligation (ARO) and an environmental obligation
- recall the accounting related to initial measurement of AROs
- recall the accounting related to subsequent measurement of AROs
- apply the measurement and accounting requirements to AROs.

ASU 2018-17: FASB Further Amends Consolidation Guidance

18-WB-115-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

This course provides an update on consolidation guidance under U.S. GAAP in ASU 2018-17 and discusses how to apply the private company variable interest entity exemption and decision maker variable interest criteria.

By the end of this course, participants should be able to:

- identify the key updates in ASU 2018-17
- recognize how to apply the new private company variable interest entity exemption and the decision maker variable interest criteria.

Basic Accounting for Crowdfunding

22-NA-004-TR

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Overview

Crowdfunding continues to grow in popularity to generate the necessary capital to fund all sorts of projects and businesses. This fundraising method allows an individual or entity to bypass the standard means of raising money for a new venture—such as bank loans or venture capital. There's no dilution of ownership, board oversight, or mandatory financial reporting requirements to the contributors. This course gives an overview of crowdfunding and basic accounting considerations. This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- recognize accounting for simple, straightforward crowdfunding campaigns.

Basic Interview Techniques for Forensic Accountants

22-WB-008-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

CPAs and Forensic Accountants are often asked to help attorneys, boards of directors, management, regulators, law enforcement and others to determine the facts surrounding complex financial matters. In a forensic investigation, interviews are critical when determining the who, what, when, where, how and why of a matter under review. This course will outline basic interview techniques that are essential in gathering facts and steering an investigation in the right direction. This course provides a general review of interview techniques for a forensic accountant from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- identify characteristics of an effective interview
- recognize considerations and proper procedures in gathering, marking, and preserving evidence for admissibility in a legal proceeding
- identify the various types of questions that can be used during an interview
- recognize the possibility and effects of deception on gathering information through interviews
- recognize some 'flags' that the interviewee may be deceptive in her/his response for one reason or another
- identify successful techniques in obtaining and reporting confessions
- identify appropriateness and dangers of various interview locations.

Business Combinations Advanced Issues and Application of ASC Topic 805

19-WB-202

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course addresses advanced issues and application of the accounting for business combinations, including recognition principles, measurement period adjustments, noncontrolling interest, and disclosures. Accounting for business combinations can be extremely complex so it is important to be familiar with ASC 805 guidance related to more advanced issues.

By the end of this course, participants should be able to:

- recognize exceptions to the recognition and measurement principles of ASC 805
- define a noncontrolling interest
- identify a measurement period and the required accounting for measurement period adjustments
- identify required disclosures of ASC 805
- apply the concepts in the acquisition method used to account for business combinations.

Business Combinations – Presentation and Disclosure

22-WB-248-TR

Field Of Study: Accounting

CPE Credits: 5.00

Level of Knowledge: Advanced

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. In this fourth course of our six-course series on business combinations, we will cover presentation and disclosure matters as we analyze certain presentation matters and the required disclosures for a business combination.

By the end of this course, participants should be able to:

- recognize business combination related transactions and issues that require disclosure in the financial statements
- compose the necessary disclosures for inclusion in the financial statements.

Accounting

Business Combinations: Emerging Issues, Potential Pitfalls, and Best Practices

22-WB-104-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course features KPMG professionals from the Department of Professional Practice discussing:

- a look back at 2021 M&A activity
- emerging issues with business combinations
- differences between U.S. GAAP and tax allocations
- common pitfalls and challenges.

By the end of this course, participants should be able to:

- recognize key differences between U.S. GAAP and tax allocations and how to avoid common valuation issues.

Note: This course is based on a live webcast that took place on April 7, 2022.

Business Combinations - Final Review in Accounting for the Transaction Updated!

23-WB-242-CL

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Intermediate

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. In this second course of our six-course series on Business Combinations, we will cover the final review process related to the initial accounting for a business combination, discussing the general recognition and measurement principles for common elements that are acquired in a business combination, including the clarifying guidance within Topic 805 for certain assets and liabilities, as well as narrow exceptions to the general recognition measurement principles.

By the end of this course, participants should be able to:

- apply the general recognition and general measurement principles during the final review process for the initial accounting for a business combination
- recall the clarifications and exceptions to the general principles
- demonstrate the ability to recognize and measure certain elements in a business combination

Business Combinations - Steps to Accounting for the Transaction Updated!

23-WB-241-CL

Field Of Study: Accounting

CPE Credits: 5.00

Level of Knowledge: Intermediate

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. The authoritative accounting and reporting guidance for business combinations under US GAAP is included in Topic 805, Business Combinations, of the FASB Accounting Standards Codification. Topic 805 interacts with various other technical areas of the Codification, such as the guidance on consolidation (the concept of control), fair value measurements, income taxes, and share-based payments. Thus, a reporting entity must be familiar with not only Topic 805, but also these other technical areas. In this first course of our six-part course series on Business Combinations, we will cover, in depth, the steps that must be taken to properly account for every business combination transaction.

By the end of this course, participants should be able to:

- recall the four basic steps in the acquisition method
- identify or determine the acquirer, acquire, acquisition date, and measurement period for the business combination
- recognize and measure the assets, liabilities, and noncontrolling interests, as well as any goodwill or gain from a bargain purchase

Business Combinations – Goodwill

22-WB-246-TR

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Advanced

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. In this third course of our six-course series on Business combinations, we will cover the subsequent measurement of certain elements in a business combination and ongoing measurement of goodwill.

By the end of this course, participants should be able to:

- identify certain elements of a business combination that require subsequent measurement
- recall the overall goodwill impairment testing process.

Accounting

Business Combinations, Goodwill, and Other Intangible Assets **New!** 23-WB-269-CL

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Advanced

Understand the implications of business combinations as regulated by the FASB Accounting Standards Codification Topic 805 including how to identify the acquirer and acquiree. In addition, the application of the acquisition method is addressed with emphasis on the calculation of goodwill and the computation of a bargain purchase. Furthermore, this course presents the amortization of intangibles and indicators, recognition and measurement associated with impairments of goodwill and other intangible assets. In the final chapter, financial statement presentation, disclosure, and other issues are explained. All ASUs issued through 2023-01 are included in the course.

This course is most beneficial to professionals new to business combinations who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to business combinations.

By the end of this course, participants should be able to:

- identify acquirer and acquiree
- calculate the amount of goodwill and the gain from a bargain purchase
- summarize the amortization of intangibles
- explain the impairment and disposal of goodwill and other intangibles
- apply the standards related to the acquisition of contract assets and contract liabilities in a business combination
- summarize financial statement presentation, disclosures, and miscellaneous issues
- apply the standards related to pushdown accounting

Business Combinations – Other Important Considerations

22-WB-250-TR

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Advanced

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. In this fifth course of our six-course series on business combinations, we will cover income tax matters, foreign currency matters, and pushdown accounting.

By the end of this course, participants should be able to:

- determine deferred taxes and tax accounting for equity-classified replacement awards in a business combination
- determine a foreign entity's functional currency, translate balances recorded, assign translation adjustments for goodwill, and release cumulative translation adjustments related to step acquisitions and dispositions
- define, discuss the election of, apply, and provide disclosures about pushdown accounting

Business Combinations – Subtopic 805-50 Related Issues 22-WB-252-TR

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Advanced

Mergers, acquisitions, and other types of business combinations are a common strategy among companies to grow their businesses or diversify their risk. Entering into business combinations can help companies reach new geographic markets, expand product offerings, or achieve various synergies. Business combinations offer a number of benefits to the parties involved, but the initial accounting for the business combination can be complicated and often requires extensive time and effort. In this sixth and final course of our six-course series on business combinations, we will cover acquisition of assets, entities under common control, distinguishing a transfer of assets from a transfer of a business, master limited partnerships, and reverse acquisitions.

By the end of this course, participants should be able to:

- define a business, determine the acquirer's total cost to acquire the assets, and allocate those costs to the individual assets acquired and liabilities assumed
- identify a common control transaction, distinguish a transfer of assets from a transfer of a business, discuss presentation matters, and determine required disclosures
- articulate the formation of a master limited partnership, and identify formations that do not result in a new basis (historical basis) from those that do result in a new basis (pushdown accounting)
- define reverse acquisition, identify its characteristics, discuss its recognition and measurement, and discuss presentation matters.

Business Combinations Scope Recognition and Measurement Principles 19-WB-203

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course covers the accounting and reporting requirements for business combinations in accordance with ASC 805: Business Combinations. It is very common for an entity to acquire a business, so it is important to be familiar with the considerations when an acquisition falls within the scope of ASC 805. This course addresses the scope of ASC 805, differences between what is considered a business combination or an asset purchase, the 4-step acquisition process and recognition and measurement principles as it relates to assets acquired and liabilities assumed.

By the end of this course, participants should be able to:

- identify transactions within the scope of ASC 805
- identify the differences between a business combination and an asset purchase
- recognize the four-step process used to account for business combinations
- apply the concepts in the four-step process used to account for business combinations
- indicate when assets and liabilities should be recognized apart from goodwill and how they should be measured.

Accounting

Cash Flows (FASB ASC 230)

23-WB-126-TR

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Basic

Cash flows can be a basic concept, but the preparation of a cash flow statement can be tricky. The analysis of transactions and determination of the proper classification is essential in order to present this critical information to the users of the set of financial statements required by GAAP. This comprehensive course provides a concise overview of the topic of cash inflows, cash outflows and all the complicated currents in between. A special summary chapter covers miscellaneous reporting requirements and review statement of cash flows procedures.

This course is most beneficial to professionals new to Cash Flows who may be at the staff or entry level in an organization but also for a seasoned professional with limited exposure to Cash Flows.

By the end of this course, participants should be able to:

- recognize topics related to a statement of cash flows
- classify transactions for each of the appropriate sections of the statement of cash flows (operating, investing and financing activities)
- identify cash flow reporting issues.

Consolidation Accounting – The Consolidation Analysis

19-WB-211

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course introduces consolidation accounting and the two consolidation models in ASC 810 Consolidation. It covers the consolidation analysis steps that an entity follows to determine which consolidation model is the appropriate model to evaluate a legal entity for consolidation.

By the end of this course, participants should be able to:

- recall the two primary consolidation models under ASC 810
- recognize scope exceptions to ASC 810 and to the Variable Interest Entity Model
- apply scope exceptions within ASC 810 and the variable interest entities model
- identify variable interests held
- apply the requirements of ASC 810 when identifying variable interests held
- employ the three characteristics used to determine whether or not the entity in question is a variable interest entity.

Credit Losses Under ASC 326

20-WB-224

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

Estimating credit losses under ASC 326 requires a high degree of judgment. It also requires the application of a consistent methodology that must consider information about past events, current conditions, and reasonable and supportable forecasts about the future.

This course covers the principles of and accounting for credit losses under ASC Topic 326, including how to estimate credit losses, considering information about past events, current conditions, and reasonable and supportable forecasts.

By the end of this course, participants should be able to:

- identify instruments within the scope of the CECL model
- recall the principles and concepts to be applied when estimating current expected credit losses under ASC 326
- recognize when the “gross-up” approach for calculating the Day 1 amortized cost of purchased credit deteriorated assets is appropriate
- recall the process of assessing available-for-sale debt securities for impairment under ASC 326.

Derivatives – Accounting Basics

23-WB-300

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course explores the identification of and accounting requirements for freestanding derivatives and the basic accounting requirements for embedded derivatives.

By the end of this course, participants should be able to:

- identify characteristics of derivative instruments under ASC 815
- recognize scope exceptions described under ASC 815
- recall the principles of accounting for freestanding and embedded derivative instruments.

NOTE: For additional technical and/or regulatory updates, please subscribe to Financial Reporting View for the latest insights.

Discontinued Operations: Back-to-Basics

23-WB-103-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

In this course, KPMG professionals provide a refresher on the discontinued operations (ASC 205-20) and held-for-sale [HFS] (ASC 360-10) guidance, including key SEC requirements and trends. Topics include:

- scope of ASC subtopics 205-20 and 360-10
- key concepts (component, disposal group and discontinued operations)
- determining the appropriate disposal group
- measuring HFS disposal groups and timing of gain or loss
- determining if the strategic shift test is met
- reporting discontinued operations
- interplay with SEC requirements for registrants
- SEC staff comment letter trends.

By the end of this course, participants should be able to:

- explain accounting for discontinued operations and held-for-sale disposal groups.

Note: This course is based on a live webcast that took place on March 15, 2023.

Accounting

Discount Rate for Lessees **New!**

23-WB-263-CL

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA discusses the lease guidance and how to determine the discount rate to be used in ASC 842 by lessees.

By the end of this course, participants should be able to:

- determine how the discount rate impacts the liability
- determine the factors affecting the incremental borrowing rate and the methods to use
- identify the disclosures to be made

EPS: Back-to-Basics Refresher

20-WB-103-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, KPMG professionals discuss the fundamentals of calculating and presenting earnings per share (EPS), as well as latest developments, including scope, basic EPS, diluted EPS, participating securities and the two-class method, retrospective adjustments, EPS in interim financial statements, and the related presentation and disclosure requirements.

By the end of this course, participants should be able to:

- understand how to calculate and present earnings.

ESG Fundamentals: ESG 101

21-WB-405

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

Companies, both globally and in the United States, have a heightened awareness about environmental, social and governance (ESG) issues as investors, regulators, and the community at large are demanding greater transparency and board accountability. Organizations that prioritize ESG can drive value and mitigate risks to operations and the bottom line over time.

This course will cover the fundamentals about ESG, including an overview of the different ESG standards and frameworks, a review of leading ESG trends and issues, and factors to consider as companies begin their ESG journey.

By the end of this course, participants should be able to:

- define the role of ESG factors in building long-term financial sustainability and value creation
- identify the leading ESG guidance and reporting frameworks and the challenges in measuring and reporting ESG data
- recognize the phases in an organization's ESG journey.

Fair Value: Definition and Key Elements

23-WB-307

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

This course explores the definition, key elements and requirements for fair value measurement accounting.

Measuring fair value requires a consistent process and involves significant judgement and estimation.

In this course, you will be introduced to:

- the definition of fair value
- the key elements of fair value, including principal market, exit price, market participant assumptions, and orderly transactions.

By the end of this course, participants should be able to:

- recall the definition of fair value and the key elements of the definition in accordance with ASC Topic 820
- identify the use of market participant assumptions for fair value measurements.

NOTE: For additional technical and/or regulatory updates, please subscribe to Financial Reporting View for the latest insights.

Financial Answers to Common Inventory Issues

23-WB-222-CL

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

Inventory is one of the most valuable assets in a company. As with physical inventories, service inventories allow firms to buffer their resources from the variability of demand and reap the benefits from economies of scale while also providing customers with faster response times. The service industry inventory mostly includes the steps involved before completing a sale. Whether dealing with physical or service inventories, an organization will need to protect its inventory and nurture it in the right direction to be profitable. Finding that balance between meeting customers' demand and supporting a healthy profit margin for the business is the focus of this course. This overview level course provides a general review of this topic from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- identify various techniques to manage inventory.

Financial Management – Budgeting and Forecasting

22-WB-107-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course presents an overview of the importance in preparing a forecast and budget as well as the different methodologies associated with these two very important tools used in managing a business. The process of developing an effective forecast is more of an art rather than a science. Budgeting can be a challenge simply as a result of the negative connotation associated with the term.

This course is most beneficial to professionals new to forecasting and budgeting who maybe be at the staff or entry level in organization but also for seasoned professionals with limited exposure to forecasting and budgeting.

By the end of this course, participants should be able to:

- demonstrate an understanding of the key aspects of an effective forecast
- recognize the different methodologies for creating a forecast
- identify the purpose for creating and using a budget for successful financial management
- differentiate between different budgeting processes.

Accounting

GHG Emissions Reporting for Finance Professionals

23-WB-105-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Intermediate

Most companies follow the Greenhouse Gas Emissions (GHG) Protocol in measuring and reporting emissions. With SEC regulation pending and international disclosure requirements being finalized, KPMG professionals explain the basics of how emissions are measured and reported.

Topics include:

- foundational concepts
- the organizational and operational boundaries
- emissions calculations
- scope 1, 2 and 3
- tracking emissions and setting targets
- offset credits
- reporting.

By the end of this course, participants should be able to:

- explain the foundational concepts of how emissions data are gathered, measured and reported.

Note: This course is based on a live webcast that took place on May 3, 2023.

Going Concern

20-WB-109-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, KPMG professionals will discuss when substantial doubt exists about a company's ability to continue as a going concern, how to assess the mitigating effects of management's plans, and the resulting financial reporting implications.

By the end of this course, participants should be able to:

- understand the requirements for going concern assessments under ASC 205-40
- identify conditions and events that may raise substantial doubt about an entity's ability to continue as a going concern
- assess the mitigating effects of management's plans
- understand the disclosures required under ASC 205-40
- understand the impacts of the going concern assessment on internal controls over financial reporting, other accounting matters, and the auditors' report.

Goodwill Impairment Primer 2021

21-WB-115-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

In this course, KPMG professionals discuss current market trends, recent accounting developments, and potential pitfalls to consider when assessing goodwill impairments.

By the end of this course, participants should be able to:

- understand the recent historical economic and market trends impacting goodwill impairment
- apply relevant guidance to goodwill impairment testing
- understand common valuation issues that may arise in goodwill impairment testing
- evaluate the impact of proposed changes to the subsequent accounting for goodwill and identifiable intangible assets.

Note: This course is based on a live webcast that took place on August 25, 2021.

Going Public via a SPAC

22-WB-406

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

There has been explosive growth in recent years in the volume of transactions involving special-purpose acquisition corporations (SPACs), making them a hot topic for investors, acquirers and sellers. In this session, KPMG professionals discuss these "blank check" entities, which exist solely to acquire other companies, including deal flow, the life cycle of a SPAC and current trends in the marketplace. Presenters also discuss accounting and reporting intricacies that companies planning to go public via a SPAC should consider.

By the end of this course, participants should be able to:

- recall the accounting and financial reporting considerations when planning to go public via a SPAC.

Note: This course is based on a live session that took place on November 17, 2021.

Hedge Accounting Qualification

19-WB-204

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this module, you will learn about the criteria to qualify for hedge accounting, as prescribed by ASC 815 Derivatives and Hedging, and the effectiveness requirements to maintain hedge qualification. There is strict criteria prescribed by ASC 815 that must be met in order to apply hedge accounting. It is important that you know the hedge qualification criteria to ensure that hedge accounting is applied appropriately.

By the end of this course, participants should be able to:

- identify the documentation requirements to qualify for hedge accounting
- recognize the hedge accounting qualification requirements for hedge items and the risk being hedged
- recognize the hedge accounting qualification requirements for the hedging instrument
- recall the effectiveness requirements to qualify for hedge accounting.

Hot Topics in Accounting for Compensation Arrangements

23-WB-116-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this course, KPMG professionals discuss hot topics in compensation arrangements, including the SEC's clawback rule and the FASB's proposed ASU on profits interests. Topics include:

- The SEC's clawback listing standards (Rule 10D-1)
- The FASB's proposed ASU on profits interests.

By the end of this course, participants should be able to:

- recall requirements of the SEC's compensation clawback rule (Rule 10D-1)
- determine when and how to account for clawbacks
- identify the impacts of the FASB's proposed ASU on profits interests awards.

Note: This course is based on a live webcast that took place on August 16, 2023.

Accounting

How Stablecoin Can Stabilize Cryptocurrency

22-WB-247-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

Cryptocurrency and its volatility have created a conundrum for the accounting standards setters. Because of its high volatility, many are searching for an intermediate digital asset that is designed to provide a steady value that doesn't fluctuate in this virtual landscape. This is the space where stablecoin lives and it plays an important role in the cryptocurrency market.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- define stablecoin and its purpose.

How Businesses are Embracing Change

22-NA-000-TR

Field Of Study: Accounting

CPE Credits: 0.17

Level of Knowledge: Overview

Many businesses were shut down in 2020, at least temporarily. As businesses reopen, a new round of challenges emerges for accountants.

This course explores trends as businesses reopen and the related accounting effects of our changing economic environment. This basic overview may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- Subscriptions
- identify the trends and accounting challenges for businesses.

IFRS – Accounting Policies and Changes in Accounting Estimates and Errors – IAS 8

19-WB-458

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an overview on how to select accounting policies, account for changes in accounting policies and estimates, account for errors in the financial statements, and describe the respective disclosure requirements under IFRS.

By the end of this course, participants should be able to:

- recall IFRS guidance on selecting and applying accounting policies in preparing and presenting IFRS financial statements
- identify a change in an accounting policy, a change in an accounting estimate, an error, and related accounting
- apply requirements in IAS 8 to changes in accounting policies, changes in accounting estimates, and correction of errors.

IFRS – Agriculture – IAS 41

17-WB-479

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course explains the accounting and disclosure requirements of IAS 41 Agriculture.

By the end of this course, participants should be able to:

- identify the scope and objective of IAS 41
- identify recognition and measurement requirements for biological assets and agricultural produce
- identify presentation and disclosure requirements of IAS 41.

IFRS – Application of IAS 38 – Technical Feasibility

17-WB-604

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course demonstrates how the criteria for capitalization of development costs are applied in different industries, through the use of case studies using examples from three different industries. The course also shows the distinction between the research phase and the developments phase, and explains which types of costs should be capitalized. The course covers application guidance for concepts covered under IFRS – Tangible and Intangible Assets – Part I Recognition and Measurement Principles – IAS 16 and IAS 38, which is a suggested prerequisite for this course.

By the end of this course, participants should be able to:

- apply the requirements of IAS 38 for capitalization of certain development costs to different kinds of development projects in different industries
- identify the types of costs that are included in the carrying amount of intangible assets
- identify the differences between U.S. GAAP and IFRS with respect to the recognition and measurement of internally-generated intangible assets.

IFRS – Business Combinations – IFRS 3

19-WB-477

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides an overview of IFRS 3 and explains the acquisition method, measurement and recognition principles and disclosures required by IFRS 3 via interactive examples.

By the end of this course, participants should be able to:

- identify the scope of IFRS 3
- determine whether a transaction or other event is a business combination
- calculate the consideration transferred
- recall and apply initial and subsequent recognition and measurement principles for the identifiable assets acquired, the liabilities assumed, and any non-controlling interests in the acquiree
- recall and apply exceptions to the general recognition and measurement principles
- recall and apply requirements of IFRS 3 to a business combination achieved in stages and to a business combination achieved without transferring consideration
- identify disclosures required by IFRS 3.

IFRS – Consolidation – IFRS 10 and 12

17-WB-605

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course explains the control model in IFRS 10 Consolidated Financial Statements and required disclosures in IFRS 12 Disclosures of Interests In Other Entities. The course also explains presentation requirements for non-controlling interests, consolidation accounting requirements and accounting for a loss of control.

By the end of this course, participants should be able to:

- identify the scope and core principles of IFRS 10
- recall the control model in IFRS 10
- identify how to apply consolidation accounting in accordance with IFRS 10
- identify requirements for consolidation accounting and accounting for non-controlling interest and loss of control
- apply steps of the control model in IFRS 10 to specific scenarios
- determine journal entries to account for a loss of control
- identify the disclosure requirements in IFRS 12.

Accounting

IFRS – Debt and Equity Classifications – IAS 32

18-WB-476

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course provides an introduction to IAS 32, Financial Instruments: Presentation and its requirements for debt and equity classification.

By the end of this course, participants should be able to:

- identify the definition of a financial instrument and whether various instruments are treated as debt or equity under IFRS
- identify financial instrument settlement provisions and their impact on classification in the financial statements
- identify compound instruments, the corresponding bifurcation process, and accounting impact on the financial statements
- identify transaction costs for debt, equity, and compound instruments and how to account for those transaction costs under IFRS
- assess the classification and accounting treatment for treasury shares and dividends paid on liability and equity instruments.

IFRS – Derecognition – IFRS 9

21-WB-475

Field Of Study: Accounting

CPE Credits: 0.00

Level of Knowledge: Basic

This course provides an introduction to derecognition of financial assets and liabilities (IFRS 9).

By the end of this course, participants should be able to:

- select the appropriate steps and requirements of the eight-step model for derecognition of financial assets
- select the accounting for transfers of financial assets qualifying and not qualifying for derecognition
- identify securitization transactions and their impact on derecognition assessment
- recall the criteria for derecognizing financial liabilities and the related accounting
- apply requirements of IFRS 9 for derecognition of financial assets and liabilities to specific situations.

This course is part of the IFRS Curriculum series.

IFRS – Employee Benefits Amended IAS 19 and IFRIC 14

19-WB-602

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course explains the different categories of employee benefits and how to account for each type of employee benefits under IAS 19. The course also provides presentation and disclosure requirements for post-employment benefits.

By the end of this course, participants should be able to:

- identify the appropriate accounting treatment and presentation and disclosure requirements for post-employment benefits, including the determination of whether a post-employment plan is a defined contribution plan or a defined benefit plan
- identify the appropriate accounting treatment, presentation and disclosure requirements for short-term, other long-term, and termination benefits
- identify the major differences between IFRS and U.S. GAAP for employee benefits
- apply IAS 19 to determine attribution of post-employment benefits, PV of DB obligation, lump sum payments, and the related amounts to be recognized in the financial statements
- apply IAS 19 to determine if the benefits are short-term, other long-term, or termination benefits and the related accounting, presentation and disclosure.

IFRS – Financial Instruments – Classification and Measurement – IFRS 9

21-WB-487

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an overview of requirements in IFRS 9 with respect to classification and measurement of financial instruments and differences between IFRS 9 and U.S. GAAP (ASU 2016-01).

By the end of this course, participants should be able to:

- recall classification and measurement requirements for financial instruments in IFRS 9
- identify key differences when classifying and measuring financial instruments under IFRS 9 and U.S. GAAP.

IFRS – Financial Instruments – Impairment – IFRS 9

17-WB-488

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides overview of requirements in IFRS 9 with respect to impairment and differences between IFRS 9 and U.S. GAAP (ASU 2016-13).

By the end of this course, participants should be able to:

- recall impairment requirements in IFRS 9
- identify key differences between IFRS 9 and U.S. GAAP (ASC Topic 326) with respect to impairment.

IFRS – First-time Adoption of International Financial Reporting Standards – IFRS 1

21-WB-457

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course provides an overview of transition requirements, mandatory exceptions and mandatory exemptions available on the first-time adoption of IFRS.

By the end of this course, participants should be able to:

- identify the general requirements to be applied when an entity adopts IFRS and prepares its first IFRS financial statement
- identify the mandatory exceptions and optional exemptions granted by IFRS 1
- recognize the process of adoption and conversion to IFRS
- identify the presentation and disclosure requirements including the required reconciliations when an entity prepares its first IFRS financial statements
- apply IFRS 1 to specific scenarios related to applicability, mandatory exceptions and optional exemptions, transition adjustments, and required financial statements and reconciliations.

Accounting

IFRS – Foreign Exchange Rates and Financial Reporting in Hyperinflationary Economies

19-WB-483

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course is intended to provide an introduction to foreign exchange rates, hyperinflationary economies, and related disclosure considerations under IAS 21 and IAS 29.

By the end of this course, participants should be able to:

- identify requirements for translating foreign currency transactions and balances into an entity's FC and related definitions
- apply requirements of IAS 21 to identify an entity's FC, and translate FX transactions and balances into an entity's FC
- recall requirements for translating financial statements into a presentation currency
- identify characteristics indicating that an economy is hyperinflationary
- recall basic restatement procedures of FS whose FC is that of a hyperinflationary economy in accordance with IAS 29
- identify the presentation and disclosure requirements of IAS 21 and IAS 29.

This course is part of the IFRS Curriculum series.

IFRS – Hedge Accounting – IFRS 9

21-WB-466B

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an introduction to hedge accounting in accordance with IFRS 9.

By the end of this course, participants should be able to:

- identify qualifying hedging instruments and hedged items
- determine the type of hedging relationship and related accounting
- determine when fair value option can be applied as an alternative to hedge accounting
- identify requirements for hedge accounting, including hedge effectiveness, documentation, rebalancing, and discontinuing hedge accounting
- recall differences between IFRS 9 and U.S. GAAP (ASU 2017-12) related to hedge accounting.

IFRS – IAS 36 – Application Issues – Impairment of Long-Lived Assets and Goodwill

17-WB-603

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Intermediate

Through the use of a case study, this course explains how cash generating units are determined for testing for impairment under IAS 36. The course also explains how the recoverable amount of an asset or a cash-generating unit is calculated, how the impairment charge is allocated to the underlying assets in a cash generating unit, and how the reversal of impairment is accounted for. The course describes the presentation and disclosure requirements for impairment of assets. The course covers application guidance for concepts covered under IFRS – Impairment of Assets IAS 36, which is a recommended prerequisite for this course.

By the end of this course, participants should be able to:

- recognize requirements in IAS 36 with respect to determining recoverable amount, identification of cash generating unit, timing of impairment testing and other considerations for impairment testing
- apply the principles of IAS 36 to determine the recoverable amount of an asset or CGU
- apply the principles of IAS 36 to calculate impairment loss under IFRS and U.S. GAAP
- apply the principles of IAS 36 to allocate an impairment loss to assets within a CGU
- apply the principles of IAS 36 to determine the amount of reversal of an impairment loss
- identify the differences between IFRS and U.S. GAAP with respect to the impairment of long-lived assets and goodwill.

IFRS – Impairment of Assets – IAS 36

19-WB-454

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course is intended to provide the key principles of asset impairment under IFRS through interactive examples and comparisons to U.S. GAAP.

By the end of this course, participants should be able to:

- recall the methodology for impairment testing of property, plant and equipment and intangible assets, including goodwill, under IFRS
- recall how the asset's recoverable amount is determined
- compute recoverable amount and impairment loss, including reversals
- identify appropriate accounting for reversals of impairment
- identify the differences between IFRS and U.S. GAAP with respect to the impairment of long-lived assets, indefinite lived intangibles and goodwill.

This course is part of the IFRS Curriculum series.

IFRS – Income Taxes – IAS 12

18-WB-465

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides an introduction to IAS 12, Income Taxes.

By the end of this course, participants should be able to:

- compute current and deferred taxes
- identify general recognition and measurement principles in IAS 12
- determine the tax rates to be used
- identify the exceptions for recognizing a DTL or DTL
- identify considerations for recognition of deferred taxes for investments in subsidiaries, equity method investments and business combinations
- identify how deferred taxes are recognized for uncertain tax positions, forex differences, and share-based payments
- identify disclosures and presentation requirements in IAS 12
- identify permanent and temporary differences
- identify requirements of IFRIC 23 and compute amounts for to tax uncertainties.

Accounting

IFRS – Interim Financial Reporting and Impairment (IAS 34, IFRIC 10) 17-WB-478

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course is intended to explain accounting and disclosure requirements of IAS 34 Interim Financial Reporting and IFRIC 10 Interim Financial Reporting and Impairment.

By the end of this course, participants should be able to:

- identify the components, form, and content of interim financial statements
- recognize the recognition, measurement, and disclosure requirements in IAS 34
- identify the periods for which interim financial reports are to be presented
- apply the recognition and measurement principles in an interim financial report
- identify the key differences between IFRS and U.S. GAAP as they relate to interim financial reporting.

IFRS – Introduction to IFRS and its Framework

19-WB-451

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

IFRS – Introduction to IFRS and its Framework is a 1-hour interactive web-based self-study that provides an introduction to IFRS. The course will include an overview of the IASB and its objectives and describe the fundamentals of the IFRS framework.

By the end of this course, participants should be able to:

- recall the history of IFRS and the composition of IFRS
- identify the objectives of the IASB and its process for issuing standards
- recall what it means to comply with IFRS and how the hierarchy influences the selection of accounting policies
- identify the key concepts within the IFRS Framework.

IFRS – Investment Property – IAS 40

19-WB-470

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an introduction to IAS 40, Investment Property.

By the end of this course, participants should be able to:

- identify investment property
- determine the recognition and measurement criteria for investment property under IFRS versus U.S. GAAP
- identify how to account for transfers to and from property, plant and equipment; inventory; and disposals of investment property
- identify the related disclosure requirements
- apply IAS 40 requirements for recognition and measurement of investment property to determine classification and amounts recognized in the financial statements.

IFRS – Joint Ventures IFRS 11 and IAS 28

22-WB-606

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course explains the different types of joint arrangements and how to account for each type of joint arrangement. The course also explains the concept of significant influence and how it is determined. Additionally, this course explains the equity method of accounting for joint ventures and investments in associates, including the treatment of transactions between the investor and the investee.

By the end of this course, participants should be able to:

- recognize requirements in IFRS 11 including its scope, the definitions of joint control, joint arrangement, joint operation, joint venture and accounting
- classify joint arrangements as a joint operation or a joint venture
- identify requirements in IAS 28 for determining significant influence, related accounting and disclosure and accounting for changes in ownership interest or voting rights
- apply equity method accounting to selected scenarios.

IFRS – Presentation of Financial Statements – IAS 1 and IAS 10

17-WB-464

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an overview to presentation of financial statements, including events after the reporting period (IAS 1 & IAS 10).

By the end of this course, participants should be able to:

- recall the scope of IAS 1 Presentation of Financial Statements
- identify the purpose, features, structure and content of financial statements
- determine whether financial statements should be prepared on a going concern basis
- determine classification of assets and liabilities as current and non-current
- identify adjusting and non-adjusting events and accounting and disclosure requirements for events after the reporting period.

IFRS – Revenue from Contracts with Customers – IFRS 15 vs. ASC 606

23-WB-470

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course focuses on differences between IFRS 15 and ASC 606.

By the end of this course, participants should be able to:

- recall requirements of IFRS 15
- identify differences between IFRS 15 and ASC 606
- apply IFRS 15 and ASC 606 to various scenarios.

Accounting

IFRS Selected Disclosures – Financial Instruments – Disclosures and Related Party Disclosures and Operating Segments – IFRS 7, IAS 24 and IFRS 8

21-WB-461

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides an introduction to presentation of certain selected disclosures for financial instruments under IFRS 7, related party disclosures under IAS 24, and operating segments under IFRS 8.

By the end of this course, participants should be able to:

- identify the purpose, scope, and application of selected IFRS disclosure standards: IFRS 7 Financial Instruments: Disclosures; IAS 24 Related Party Disclosures; and IFRS 8 Operating Segments
- identify key features and requirements of IFRS 7 Financial Instruments: Disclosures
- identify key features and requirements of IAS 24 Related Party Disclosures
- identify key features and requirements of IFRS 8 Operating Segments
- identify the key differences between IFRS and U.S. GAAP as they relate to selected disclosures.

IFRS – Share-based Payments – IFRS 2

18-WB-462

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides an overview of IFRS 2 Share-based Payment via interactive examples and comparisons to U.S. GAAP.

By the end of this course, participants should be able to:

- identify the differences between equity-settled, cash-settled, and compound share-based payment transactions
- identify the recognition, measurement, and attribution for share-based payment transactions
- determine how to classify share-based payment awards
- determine the impact of modifications to a share-based payment plan
- determine the impact of share-based payment transactions on accounting for income taxes
- identify the disclosure requirements for share-based payment transactions
- identify vesting conditions and amounts to recognize in the financial statements.

IFRS – Statement of Cash Flows – IAS 7

19-WB-485

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This 1.5-hour, CPE-eligible, interactive, web-based self-study is part of the IFRS curriculum. It is intended to provide an introduction to presentation of cash flow information in the Statement of Cash Flows under the direct and indirect methods under IAS 7.

By the end of this course, participants should be able to:

- identify requirements in IAS 7, including the scope, objective, definitions and guidance for reporting cash flows
- classify different transactions in a statement of cash flows
- identify differences between the direct and indirect method for presenting operating cash flows
- prepare a statement of cash flows based on the direct method and on the indirect method
- identify the disclosure requirements of IAS 7, including items to be disclosed separately (i.e., non-cash transactions, changes in liabilities arising from financing activities and acquisitions, and disposals of subsidiaries or other business units).

IFRS – Tangible and Intangible Assets – Part I Recognition and Measurement Principles – IAS 16 and IAS 38

21-WB-453

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides the key principles of asset recognition and measurement under IFRS through interactive examples and comparisons to US GAAP.

By the end of this course, participants should be able to:

- identify tangible and intangible assets
- recall the recognition and measurement criteria for tangible and intangible assets
- identify the appropriate accounting for subsequent costs related to tangible and intangible assets
- identify the major recognition and measurement differences between IFRS and U.S. GAAP with respect to accounting for tangible and intangible assets.

IFRS – Tangible and Intangible Assets Part II – Disposals Replacements AHFS and Disc Ops – IAS 16, IAS 38 and IFRS 5

21-WB-460

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides an overview of the retirement and disposal criteria applicable for tangible and intangible assets; criteria and treatment for classifying assets as held for sale or as discontinued operations; and the related disclosure requirements under IFRS.

It is recommended that IFRS – Tangible and Intangible Assets Part I – Recognition and Measurement Principles – IAS 16 and IAS 38 be completed prior to taking this self-study.

By the end of this course, participants should be able to:

- identify the retirement and disposal criteria applicable for tangible and intangible assets
- identify the criteria for classifying tangible and intangible assets as held for sale or as discontinued operations
- identify the measurement and presentation requirements for assets held for sale, discontinued operations, and retirements
- assess the allocation of goodwill when a portion of a cash-generating unit is disposed of or internally restructured
- identify the presentation and disclosure requirements for tangible and intangible assets
- apply IFRS presentation and measurement requirements regarding assets held for sale and disc ops to selected transactions.

IFRS 16 Leases

18-WB-609

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course explains when to apply IFRS 16 and lessee and lessor accounting models in IFRS 16. The course also highlights differences between IFRS and U.S. GAAP.

By the end of this course, participants should be able to:

- recall requirements of IFRS 16 Leases with respect to scope, lease definition, lessee and lessor accounting
- recall requirements of IFRS 16 with respect to sale-and-leaseback transactions, subleases and investment property
- apply requirements in IFRS 16 to identify a lease and to determine the initial and subsequent accounting, including measurement of the lease liability and right-of-use assets
- apply requirements of IFRS 16 to sale-and-leaseback transactions and subleases
- recognize the key differences between IFRS 16 Leases and ASC Topic 842 Leases.

Accounting

IFRS 17: Introduction to IFRS 17

21-WB-500

Field Of Study: Accounting

CPE Credits: 0.00

Level of Knowledge: Basic

This introduction to IFRS 17 Insurance Contracts accounting standards provides a high-level overview of contract liabilities, income statements and disclosure requirements, in accordance with IFRS 17 standards.

By the end of this course, participants should be able to:

- describe the overall purpose of IFRS 17
- recognize the wide-ranging global impacts of IFRS 17 across the insurance industry
- explain the General Measurement Model (GMM) and its components
- outline the high-level financial impacts on the valuation of an insurance contract under IFRS 17.

This course is the first of three courses that make up the IFRS 17 series:

- IFRS 17: What is IFRS? is a brief introductory animation that takes a high-level look at IFRS 17 and what it means for you. The concept of the General Measurement Model is introduced, and some of the key impacts on you and the insurance industry as a whole are highlighted.
- IFRS 17: Timeline and Business Impacts is the second of three courses in the IFRS 17 series. This course introduces the IFRS 17 timeline and key presentational, business, operational and people impacts of the Standard.
- IFRS 17: Primary Statements and Disclosure is the third of three courses in the IFRS 17 series. This course covers the new KPIs under IFRS 17 and how they affect presentation, and the new requirement of primary statements and disclosures on insurance liabilities.

This course is not CPE-eligible.

IFRS 17: Primary Statements and Disclosure

21-WB-502

Field Of Study: Accounting

CPE Credits: 0.00

Level of Knowledge: Basic

This course covers the new KPIs under IFRS 17 Insurance Contracts and how they affect presentation, and the new requirement of primary statements and disclosures on insurance liabilities.

By the end of this course, participants should be able to:

- describe the format of the primary statements
- explain the Key Performance Indicators (KPIs), 'CSM' and 'insurance revenue' and their measurement
- explain some of the disclosure requirements for insurance contracts
- explain the new mandatory reconciliations for insurance contracts.

This course is the third of three courses that make up the IFRS 17 series:

- IFRS 17: What is IFRS? is a brief introductory animation that takes a high-level look at IFRS 17 and what it means for you. The concept of the General Measurement Model is introduced, and some of the key impacts on you and the insurance industry as a whole are highlighted.
- IFRS 17: Introduction to IFRS 17 is the first of three courses in the IFRS 17 series. This course provides a high-level overview of contract liabilities, income statements and disclosure requirements, in accordance with IFRS 17 standards.
- IFRS 17: Timeline and Business Impacts is the second of three courses in the IFRS 17 series. This course introduces the IFRS 17 timeline and key presentational, business, operational and people impacts of the Standard.

This course is not CPE-eligible.

IFRS 17: Timeline and Business Impacts

21-WB-501

Field Of Study: Accounting

CPE Credits: 0.00

Level of Knowledge: Basic

This course introduces the IFRS 17 Insurance Contracts timeline and key presentational, business, operational and people impacts of the Standard.

By the end of this course, participants should be able to:

- describe the IFRS 17 timeline and key implementation dates
- describe some key impacts of IFRS 17 on insurers, including the effects on products and pricing, internal processes and controls, risk and KPIs, and how IFRS 17 impacts financial reporting in different geographies
- explain the importance of managing relationships with stakeholders with respect to IFRS 17.

This course is the second of three courses that make up the IFRS 17 series:

- IFRS 17: What is IFRS? is a brief introductory animation that takes a high-level look at IFRS 17 and what it means for you. The concept of the General Measurement Model is introduced, and some of the key impacts on you and the insurance industry as a whole are highlighted.
- IFRS 17: Introduction to IFRS 17 is the first of three courses in the IFRS 17 series. This course provides a high-level overview of contract liabilities, income statements and disclosure requirements, in accordance with IFRS 17 standards.
- IFRS 17: Primary Statements and Disclosures is the third of three courses in the IFRS 17 series. This course covers the new KPIs under IFRS 17 Insurance Contracts and how they affect presentation, and the new requirement of primary statements and disclosures on insurance liabilities.

This course is not CPE-eligible.

IFRS 17: What Is IFRS 17?

21-VD-500

Field Of Study: Accounting

CPE Credits: 0.00

Level of Knowledge: Basic

This brief animation takes a high-level look at IFRS 17 and what it means for you. The concept of the General Measurement Model is introduced and some of the key impacts on you and the insurance industry as a whole are highlighted.

This animation provides an introduction to the three-part IFRS 17 series of courses:

- IFRS 17: Introduction to IFRS 17 is the first of three courses in the IFRS 17 series. This course provides a high-level overview of contract liabilities, income statements and disclosure requirements, in accordance with IFRS 17 standards.
- IFRS 17: Timeline and Business Impacts is the second of three courses in the IFRS 17 series. This course introduces the IFRS 17 timeline and key presentational, business, operational and people impacts of the Standard.
- IFRS 17: Primary Statements and Disclosure is the third of three courses in the IFRS 17 series. This course covers the new KPIs under IFRS 17 and how they affect presentation, and the new requirement of primary statements and disclosures on insurance liabilities.

This video is not CPE-eligible.

Accounting

IFRS Derivatives and Embedded Derivatives – IFRS 9

21-WB-466A

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an introduction to derivatives and embedded derivatives in accordance with IFRS 9 Financial Instruments.

By the end of this course, participants should be able to:

- identify the objectives and scope of IFRS 9 as they relate to derivatives and embedded derivatives
- identify a derivative and how to account for it
- identify whether a contract to buy or sell a nonfinancial item should be accounted for as a derivative
- identify an embedded derivative
- determine whether an embedded derivative should be separated from the host contract and the related accounting treatment
- identify when reassessment of an embedded derivative is required
- apply IFRS 9 in specific situations to identify derivatives and embedded derivatives
- determine whether to account for certain contracts as derivatives
- determine whether to separate the embedded derivatives and related accounting.

IFRS Mid-Year Update 2023

23-WB-113-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

This course summarizes both key standard-setting activities of the International Accounting Standards Board (IASB) and IFRS Interpretations Committee (IFRS IC) and significant tax reform updates that may be relevant to IFRS preparers for their interim and annual financial statements.

By the end of this course, participants should be able to:

- recall recent accounting matters relevant to IFRS engagements
- recall recent income tax updates relevant to IFRS engagements
- identify key aspects of proposed IFRS sustainability disclosure standards.

Note: This course is based on a live webcast that took place on June 14, 2023.

IFRS – Hedge Accounting – IFRS 9

21-WB-466B

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an introduction to hedge accounting in accordance with IFRS 9.

By the end of this course, participants should be able to:

- identify qualifying hedging instruments and hedged items
- determine the type of hedging relationship and related accounting
- determine when fair value option can be applied as an alternative to hedge accounting
- identify requirements for hedge accounting, including hedge effectiveness, documentation, rebalancing, and discontinuing hedge accounting
- recall differences between IFRS 9 and U.S. GAAP (ASU 2017-12) related to hedge accounting.

IFRS Year-End Update

21-WB-123-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

This course summarizes the key 2021 standard-setting developments that may be relevant to IFRS preparers for their annual financial statements. This includes a summary of the IASB's and IFRS Interpretations Committee's recent and forthcoming activities.

By the end of this course, participants should be able to:

- identify the key 2021 topics that may be relevant to IFRS preparers for their annual financial statements.

Note: This course is based on a live webcast that took place on December 15, 2021.

IFRS Year-End Update 2023 New!

23-WB-122-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

This course summarizes key standard-setting activities of the International Accounting Standards Board (IASB) and provides updates on financial instruments, revenue recognition and presentation of financial statements.

By the end of this course, participants should be able to recall recent:

- IFRS standard-setting updates
- updates relating to financial instruments
- updates relating to revenue recognition
- updates relating to the presentation of financial statements project.

Note: This course is based on a live webcast that took place on December 12, 2023.

Impact of Climate Risk on the Financial Statements

21-WB-117-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

In this course, KPMG professionals discuss how climate change risks (for example, physical and transition) can affect the financial statements.

Topics include:

- types of climate risk
- how climate risk manifests in different industries
- impact of climate risk on financial position and financial performance
- application of specific U.S. GAAP standards in accounting for and disclosing climate risk
- potential standard-setting developments.

By the end of this course, participants should be able to:

- identify how climate change risks, including physical and transition risks, can affect the financial statements.

Note: This course is based on a live webcast that took place on September 13, 2021.

Accounting

Impact of EU ESG Reporting Standards on US Companies

22-WB-112-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this course, professionals from KPMG in the US and Germany discuss the latest on the EU's proposed Corporate Sustainability Reporting Directive (CSRD), including the impact on US companies.

Topics include:

- overview of the CSRD
- recent amendments made to the proposed CSRD, including
- proposed scoping requirements
- reporting exemptions
- next steps toward final regulation.

By the end of this course, participants should be able to:

- describe the key requirements of the CSRD, including the implications for US companies
- describe the key requirements of the German Supply Chain Due Diligence Act.

Note: This course is based on a live webcast that took place on October 17, 2022.

Impairment of Goodwill

20-WB-215A

Field Of Study: Accounting

CPE Credits: 0.50

Level of Knowledge: Basic

This course provides an overview of accounting for goodwill and the requirements outlined in ASC Subtopic 350-20. Such requirements relate to identifying reporting units and allocating goodwill to those reporting units and testing goodwill for impairment. This course also includes the upcoming changes to the goodwill impairment test and presentation and disclosure requirements. It is very important to be familiar with the requirements around testing goodwill for impairment because a significant amount of estimation and judgment is required.

By the end of this course, participants should be able to:

- determine an entity's reporting unit, which is the level at which goodwill is tested for impairment
- recall how to apply the steps for goodwill impairment testing under ASC 350-20
- recognize the changes to goodwill impairment testing when ASU 2017-04 becomes effective
- calculate goodwill impairment in accordance with ASC 35-20 and ASU 2017-04
- identify the presentation and disclosure requirements related to the impairment of goodwill.

DISCLAIMER: The information contained herein is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although we endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act upon such information without appropriate professional advice after a thorough examination of the particular situation.

Impairment of Nonfinancial Assets

20-WB-106-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

In this course, KPMG professionals discuss which impairment models apply to which assets, the order of impairment testing, the different units of account in testing assets for impairment, the different measurement and recognition models, and the related presentation and disclosure requirements.

By the end of this course, participants should be able to:

- recall how to test for and record impairment for indefinite-lived intangibles, long-lived assets, and goodwill.

Impairment of Property, Plant and Equipment and Intangible Assets

20-WB-222

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course focuses on the accounting guidance related to the impairment of property, plant and equipment and intangible assets, excluding goodwill. This course covers the requirements for identifying asset groups, testing for impairment, and presentation and disclosure matters relating to long-lived and intangible assets as set out in ASC 360 Property, Plant & Equipment and ASC 350 Intangibles – Goodwill and Other, respectively. It is very important to be familiar with the requirements around testing long-lived assets and intangible assets for impairment, because a significant amount of estimation and judgment is required.

By the end of this course, participants should be able to:

- determine the asset group, or the unit of account for a long-lived asset to be held and used, in accordance with ASC 360
- determine if a triggering event or indicator of impairment exists within the scope of ASC 360
- determine if the carrying amount of the asset or asset group is recoverable in accordance with Step 1 of the impairment test
- calculate future net cash flows used to test recoverability
- determine whether an asset is impaired in accordance with Step 2 of the impairment test
- calculate the impairment loss allocated to individual assets within an asset group.

International ESG Reporting: ISSB and ESRs New!

23-WB-121-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Intermediate

In this course, KPMG ESG professionals from the Department of Professional Practice examine the disclosure requirements of:

- IFRS Sustainability Disclosure Standards issued by the International Sustainability Standards Board (ISSB)
- European Sustainability Reporting Standards (ESRSs) that apply under the EU's Corporate Sustainability Reporting Directive (CSRD).

By the end of this course, participants should be able to:

- recall how the components of interoperability apply to a selection of topics from the ESRs and ISSB standards.

Note: This course is based on a live webcast that took place on October 10, 2023.

Accounting

Introduction to Bank Auditing and Accounting I

23-WB-129a-CL

Field Of Study: Accounting

CPE Credits: 11.00

Level of Knowledge: Basic

Need a refresher on government banking regulations? How about audit planning for banks? Or maybe you need to brush up on balance sheets and liabilities. Do you understand how paper checks are disappearing and being replaced by electronic check-image clearing? Do you understand the variety of proof methods and their different risks and controls?

Whatever your interests, this course is a thorough and thoroughly enjoyable overview of bank auditing and accounting.

By the end of this course, participants should be able to:

- identify the environment and organizational structure of banks
- recognize governmental regulation of the banking industry
- identify bank financial statements
- identify bank auditing, bank operations, deposit systems, and accounts
- determine the information needed for PCAOB Auditing Standard 5 walk-throughs and assessment of internal controls under the Sarbanes-Oxley Act of 2002.

Introduction to Business Valuation and Use of Guidelines

22-WB-010-TR

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Basic

This introductory course concentrates on the valuation of closely held businesses. Such valuations are often needed for estate planning and gift tax purposes. The course explains key IRS rulings and court cases that often dictate the methods used in a given case. Both the IRS and the courts emphasize using historical facts instead of a valuation based on future projections. Because of the lack of a market value for a closely held company, it is useful and desirable to calculate the valuation based on the market value of a comparable publicly held company.

This course is most beneficial to professionals new to business valuation who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this subject.

By the end of this course, participants should be able to:

- describe closely held business valuation
- identify comparable companies.

Introduction to SEC Reporting

22-WB-019-TR

Field Of Study: Accounting

CPE Credits: 4.00

Level of Knowledge: Basic

This course provides an overview of the purpose and objectives of the Securities and Exchange Commission (SEC), including the Securities Act of 1933 (Securities Act or 1933 Act) and the Securities Exchange Act of 1934 (Exchange Act or 1934 Act). The course also allows participants to become familiar with the sources of SEC rules and understand basic registration and periodic reporting requirements. Additionally, users will gain an understanding of the role of the independent auditor. The course concludes with the basic procedures and forms involved in the securities and registration process. This basic level course is most beneficial to professionals new to SEC reporting who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- identify the role of the SEC in corporate securities regulation and how it is organized
- list the basic objectives of the Securities Act and the Exchange Act
- identify the basic periodic reporting forms
- recognize the role of the independent auditor
- identify the basic procedures and forms involved in the securities registration process.

Inventory

20-WB-216

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course covers the accounting and reporting requirements for Inventory in accordance with ASC Topic 330: Inventories. The principles of inventory, including classification, cost inclusions, measurement of inventory, exchanges and presentation/disclosures in the financial statements, are touched upon in this course.

By the end of this course, participants should be able to:

- recall the various classifications of inventory
- determine what costs should be included for both purchased and/or manufactured inventory
- identify the inventory measurement principles
- recall the accounting for inventory exchanges
- apply the appropriate measurement and accounting requirements to inventory.

DISCLAIMER: The information contained herein is of a general nature and is not intended to address the circumstances of any particular individual or entity. Although we endeavor to provide accurate and timely information, there can be no guarantee that such information is accurate as of the date it is received or that it will continue to be accurate in the future. No one should act upon such information without appropriate professional advice after a thorough examination of the particular situation.

For technical and/or regulatory updates, please subscribe to Financial Reporting View for the latest insights.

Inventory: Back to Basics

21-WB-122-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, KPMG professionals provide a refresh on inventory accounting, including measurement considerations for FIFO, LIFO, average cost and retail inventory methods. Topics include:

- scope and recognition
- initial measurement
- subsequent measurement
- presentation and disclosure.

By the end of this course, participants should be able to:

- recall accounting principles for the initial recognition and measurement of inventory
- recognize how to apply the different impairment testing methods and principles
- recall disclosure requirements for public and private entities.

Note: This course is based on a live webcast that took place on December 1, 2021.

Accounting

Investments in Equity Securities

19-WB-207

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course introduces the accounting and reporting requirements for investments in equity securities and other ownership interests in an entity within the scope of ASC 321. It also provides an overview of the equity method of accounting set out in ASC 323. Many entities hold equity securities in their portfolio and the accounting guidance in this area is complex. Therefore, understanding the proper recognition and measurement according to ASC 321 and ASC 323 is important.

By the end of this course, participants should be able to:

- determine whether investments in equity securities and other ownership interests are within the scope of ASC 321
- distinguish between investments that have a readily determinable fair value and those that do not
- recognize the requirements for the use of the measurement alternative for equity securities and other ownership interests
- apply the guidance in ASC 321 for measurement alternative for equity securities and other ownership interests
- recognize the requirements for the use of the equity method of accounting.

Is this Contract a Lease – Analyzing the Facts **New!**

23-NA-016-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

This 10-minute course applies the definition of a lease under ASC 842 to various fact patterns. It explores the concepts of identified asset, control, and substantive substitution rights, and applies these concepts to various scenarios to determine if a contract should be accounted for as a lease.

By the end of this course, participants should be able to:

- recognize key components that qualify a contract to be defined as a lease.

Issuance of Debt and Equity Securities – Introduction to Accounting and Reporting

19-WB-213

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course covers the basic definitions of debt and equity securities and provides an overview of basic accounting and reporting issues surrounding the initial and subsequent recognition when these instruments are issued by an entity. Debt and equity play a key role in the analysis of an entity's financial position, liquidity, and capital-raising capacity and is therefore a focus of users of the financial statements.

By the end of this course, participants should be able to:

- recall types of debt and equity instruments commonly issued by entities
- identify the proper accounting and reporting requirements for basic debt issuances under U.S. GAAP
- recognize the appropriate accounting and reporting for extinguishments and modifications of debt under U.S. GAAP
- identify the proper accounting and reporting requirements for basic equity issuances under U.S. GAAP
- apply the appropriate accounting and reporting to common debt and equity issuances and subsequent transactions an entity typically would execute.

Leases – A Whole New World **New!**

23-WB-266-CL

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Intermediate

This course discusses the authoritative pronouncements for leases, the advantages and disadvantages of leasing, lease terminology, classification and accounting for leases, the disclosure requirements of the lessee, and sale-leaseback transactions. The guidance issued in ASUs 2016-02, 2021-05, 2021-09 and 2023-01 codified in ASC 842 is covered in these materials.

By the end of this course, participants should be able to:

- describe the advantages and disadvantages of leasing
- summarize lease terminology
- classify and account for leases from the standpoints of the lessee and lessor
- describe disclosure requirements for lessees
- discuss sale-leaseback transactions.

Lease Identification, Components, and Key Concepts

21-WB-401

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course covers some of the key aspects of ASC 842 that relate to lessee accounting, including the following:

Lease Identification, Components, and Key Concepts is the first of four in-depth courses in our series, which addresses the key requirements of the FASB's new lease accounting standard (Topic 842). This first course covers lease identification, components, and key concepts applicable to lessees and lessors under the new standard.

By the end of this course, participants should be able to:

- identify the components of a lease
- recall key definitions and concepts related to lease accounting
- determine the appropriate accounting treatment for various lease and non-lease components of a contract.

Accounting

Lessee Accounting and Transition

21-WB-402

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

Lessee Accounting and Transition is the second of four in-depth courses in our series, which addresses the key requirements of the FASB's new lease accounting standard (Topic 842).

This second course covers some of the key aspects of the standard that relate to lessee accounting, including:

- lease classification
- initial recognition and measurement
- subsequent accounting
- reassessments and modifications
- presentation and disclosures
- transition.

By the end of this course, participants should be able to:

- define key aspects of the standard that relate to lessee accounting
- identify potential changes to current accounting practice
- identify the implications of ASC 842 on their business.

Lessor Accounting and Transition

21-WB-403

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

Lessor Accounting and Transition is the third of four in-depth courses in our series, which addresses the FASB's new lease accounting standard (Topic 842).

This course covers some of the key aspects of the standard that relate to lessor accounting, including:

- lease classification
- initial and subsequent accounting
- collectibility
- lease modifications
- presentation and disclosures
- transition.

By the end of this course, participants should be able to:

- define key aspects of the standard that relate to the lessor accounting model and transition requirements
- identify potential changes to accounting practice for lessors due to ASC 842 implementation.

Lease Components New!

23-WB-267-CL

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA discusses lease components and what that means under the new lease guidance in ASC 842.

By the end of this course, participants should be able to:

- identify what guidance applies and the criteria to be met in accounting for the components
- define lease components, non-lease components, and non-components

Liquidation Basis of Accounting

21-WB-239-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Russ Madray, CPA, reviews the liquidation basis of accounting and when it should be used.

By the end of this course, participants should be able to:

- recognize when the liquidation basis should be used
- define liquidation
- identify what measurement bases to use in presenting under the liquidation basis.

Navigating Impairments in the Current Environment New!

23-WB-119-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

In this course, KPMG professionals discuss current market trends, recent accounting developments and potential pitfalls to consider when assessing goodwill, indefinite-lived intangibles and long-lived assets for impairment. Topics include:

- capital markets update and overview of observed impairment trends reported by U.S. companies
- the impact of inflation and rising discount rates on impairment testing
- frequent questions when performing long-lived asset impairment analyses
- overview of recent FASB developments.

By the end of this course, participants should be able to:

- recall recent goodwill impairment trends and acknowledge the common valuation and accounting challenges in impairment testing.

Note: This course is based on a live webcast that took place on September 27, 2023.

Overview of ASC 820 Fair Value Measurement

19-WB-101

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

Fair value is one of the most judgmental and complex areas of accounting, and most entities are subject to the fair value measurement accounting requirements in some way.

In this course, you will learn about many important considerations when measuring fair value, including:

- identifying the principal market and the transaction price
- determining if the transaction was orderly and how the market participants view the transaction
- selecting the appropriate valuation approach/technique to measure fair value
- disclosing all the important information about fair value measurements, including appropriately classifying them within the fair value hierarchy.

By the end of this course, participants should be able to:

- recall the key components of the definition of fair value in accordance with ASC 820
- identify the appropriate level in the fair value hierarchy for various instruments measured at fair value
- recognize the fair value disclosure requirements under ASC 820.

This course is the first of two that make up the Fair Value Measurement series. "Advanced Fair Value Measurement Issues" covers more advanced fair value topics such as identifying active, inactive and disorderly markets; net asset value per share as a practical expedient; and fair value considerations for liabilities.

Accounting

Overview of ASC Topic 740 Income Taxes

19-WB-103

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

ASC 740 applies to all domestic and foreign entities preparing U.S. GAAP financial statements, including not-for-profit entities with activities that are subject to income taxes. It covers the financial accounting and reporting of income taxes that result from an entity's activities during the current and preceding years.

By the end of this course, participants should be able to:

- recall the basic principles of ASC 740 to prepare a simple tax provision
- identify significant exceptions to deferred tax recognition
- describe common disclosures related to income taxes.

This course is the first of three that make up the Income Tax series:

“Advanced Income Tax Issues Under ASC Topic 740” provides a more in-depth look at the aspects of ASC 740 and the calculation of an income tax provision.

“Advanced Income Tax Issues: Uncertainty in Income Taxes” covers accounting for uncertainty in income taxes.

Overview of Foreign Exchange Transactions and Translations Updated!

20-WB-217

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course provides guidance on the general principles of accounting for foreign currency matters in accordance with ASC 830, including how to determine an entity's functional currency, account for foreign currency transactions, and translate financial statements into the functional currency of the parent.

By the end of this course, participants should be able to:

- identify foreign currencies and which currency is more valuable from an exchange rate
- compute the foreign exchange gains and losses given changes in exchange rates
- apply the functional currency concept based on the entity's primary economic environment
- recall the measurement requirements and accounting for foreign currency transactions
- recall the accounting requirements for translation of financial statements.

NOTE: For additional technical and/or regulatory updates, please subscribe to Financial Reporting View for the latest insights.

Pensions and Postretirement Benefits

20-WB-220

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course introduces the accounting and reporting requirements for pension and postretirement benefits as outlined in ASC 715 – Compensation – Retirement Benefits. This includes accounting for the postretirement benefit obligation, plan assets of defined benefit plans and components of net periodic pension costs.

Plan amendments, curtailments and settlements are also covered. Many entities provide some type of pension or postretirement benefit to its employees, but the accounting for each type of benefit has specific guidance.

By the end of this course, participants should be able to:

- recognize the differences between a defined contribution plan and a multiemployer plan
- recall the proper accounting for changes to the projected benefit obligation of defined benefit plans
- identify the proper accounting for plan assets of defined benefit plans
- determine the proper accounting for the components of net periodic pension cost
- distinguish between a plan amendment, curtailment and settlement
- recall the key presentation and disclosure requirements of defined benefit plans.

PFI: The Foundation of Fair Value Measurements

22-WB-110-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

In this course, KPMG professionals discuss the role that prospective financial information (PFI) plays in fair value measurements, PFI's relationship with discount rates, common challenges that arise with PFI and helpful resources.

By the end of this course, participants should be able to:

- recall major sources of guidance related to PFI in financial reporting.

Note: This course is based on a live webcast that took place on October 6, 2022.

Property, Plant and Equipment

19-WB-208

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

This course covers the accounting and reporting requirements for property, plant and equipment (PPE) in accordance with ASC 360, including assessing which costs would be capitalized as part of PPE, what assets are classified as PPE and depreciation methods. For many entities, PPE is often a significant line item on the balance sheet, so it is important to be familiar with what is considered PPE within the scope of ASC 360.

By the end of this course, participants should be able to:

- determine if assets are classified as PPE
- identify the types of costs that should be capitalized as part of PPE
- recognize the inputs needed and various methodologies available to calculate depreciation
- recall the allowable methods of accounting for planned major maintenance
- apply the appropriate measurement and accounting requirements to PPE.

Accounting

Pushdown Accounting

15-WB-110-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

FASB's Accounting Standards Update 2014-17 provides guidance on applying pushdown accounting to an acquired entity. This course provides an overview of that guidance.

By the end of the course, participants should be able to:

- describe when an acquired entity can apply pushdown accounting in its separate financial statements
- recognize certain implications of this accounting method.

Quarterly Outlook for Accounting and Financial Reporting (Q1 2023)

23-WB-104-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss major developments that may affect a company's accounting and financial reporting in the current period and near term. Topics include:

- tax developments impacting accounting and financial reporting, including the new global minimum tax
- SEC headlines, including recent developments on the new "compensation clawback" rule
- FASB developments and priorities
- accounting standards effective in 2023
- the latest on ESG.

By the end of this course, participants should be able to:

- recall major developments that may affect a company's accounting and financial reporting.

Note: This course is based on a live webcast that took place on March 22, 2023.

Note: There is no charge for this course. Click on the Purchase Course button to request this course.

Quarterly Outlook for Accounting and Financial Reporting (Q2 2023)

23-WB-114-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss major developments that may affect a company's accounting and financial reporting both in the current period and near term. Topics include:

- SEC developments and priorities
- the latest on ESG reporting
- FASB update.

By the end of this course, participants should be able to:

- recall major developments that may affect a company's accounting and financial reporting.

Note: This course is based on a live webcast that took place on June 21, 2023.

Note: There is no charge for this course. Click on the Purchase Course button to request this course.

Quarterly Outlook for Accounting and Financial Reporting (Q3 2023) **New!**

23-WB-118-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss major developments that may affect a company's accounting and financial reporting both in the current period and near term. Topics include:

- the latest on ESG
- recent SEC and FASB developments.

By the end of this course, participants should be able to:

- recall major developments that may affect a company's accounting and financial reporting.

Note: This course is based on a live webcast that took place on September 19, 2023.

Note: There is no charge for this course. Click on the Purchase Course button to request this course.

Quarterly Outlook for Accounting and Financial Reporting (Q4 2023) **New!**

24-WB-101-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss major developments that may affect a company's accounting and financial reporting in the current period or near term. Topics include:

- highlights from the 2023 AICPA & CIMA Conference on Current SEC and PCAOB Developments
- the latest on ESG
- recent SEC and FASB developments.

By the end of this course, participants should be able to:

- recall major developments that may affect a company's accounting and financial reporting.

Note: This course is based on a live webcast that took place on January 3, 2024.

Revenue from Contracts with Customers – Application Guidance and Disclosure Requirement

17-WB-107

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course covers selected revenue recognition application guidance, contract modifications and costs, presentation and disclosures from ASC Topic 606.

Additional application topics include:

- licenses
- sales with a right of return
- repurchase agreements
- warranties
- other topics.

By the end of the course, participants should be able to:

- define the application guidance of ASC 606
- identify the presentation and disclosure requirements of ASC 606.

This course is the third of four in the Revenue Recognition (ASC Topic 606) Series. "Revenue from Contracts with Customers – Overview" provides an overview of the standard and its basic provisions. "Revenue from Contracts with Customers – the Five Step Model" provides an overview of the model. "Revenue from Contracts with Customers – Transition, Accounting Impacts and Other Considerations" provides an understanding of transition approaches and some considerations companies should think about when selecting and implementing a transition approach.

Accounting

Revenue from Contracts with Customers – Overview 17-WB-105

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Overview

This course provides participants an overview of the revenue recognition standard (ASC Topic 606).

Topics include:

- overview of the standard, including effective date, transition, and scope
- examples of potential changes to current practice
- business impacts.

By the end of this course, participants should be able to:

- define the scope of ASC Topic 606 and recall the Five-Step Model, effective date, and transition approaches
- identify some of the potential changes to current practice
- identify the implications of ASC Topic 606 on your company's business.

This course is the first of four in the Revenue Recognition (ASC Topic 606) Series. "Revenue from Contracts with Customers – the Five Step Model" provides an overview of the model. "Revenue from Contracts with Customers – Application Guidance and Disclosure Requirements" covers selected application guidance, contract modifications and costs, presentation and disclosures. "Revenue from Contracts with Customers – Transition, Accounting Impacts and Other Considerations" provides an understanding of transition approaches and some considerations companies should think about when selecting and implementing a transition approach.

Revenue from Contracts with Customers – The Five Step Model 17-WB-106

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

This course covers the five main steps to apply the revenue recognition model in ASC Topic 606.

Topics include:

- background and scope
- the five step model.

By the end of this course, participants should be able to:

- define the five steps of the revenue recognition model.

This course is the second of four in the Revenue Recognition (ASC Topic 606) Series. "Revenue from Contracts with Customers – Overview" provides an overview of the standard and its basic provisions. "Revenue from Contracts with Customers – Application Guidance and Disclosure Requirements" covers selected application guidance, contract modifications and costs, presentation and disclosures. "Revenue from Contracts with Customers – Transition, Accounting Impacts and Other Considerations" provides an understanding of transition approaches and some considerations companies should think about when selecting and implementing a transition approach.

Revenue from Contracts with Customers – Transition, Accounting Impacts, and Other Considerations 17-WB-108

Field Of Study: Accounting
CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an understanding of transition approaches and some considerations companies should think about when selecting and implementing a transition approach to the revenue recognition requirements of ASC Topic 606.

By the end of the course, participants should be able to:

- define the transition approaches in the revenue recognition standard (ASC 606)
- recognize the accounting impact of the various transition approaches.

This course is the fourth of four in the Revenue Recognition (ASC Topic 606) Series. "Revenue from Contracts with Customers – Overview" provides an overview of the standard and its basic provisions. "Revenue from Contracts with Customers – the Five Step Model" provides an overview of the model. "Revenue from Contracts with Customers – Application Guidance and Disclosure Requirements" covers selected application guidance, contract modifications and costs, presentation and disclosures.

Revenue Recognition – Fundamentals **New!**

23-WB-265-CL

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Basic

This course covers revenue recognition guidance of FASB ASC 606, including issues concerning the five steps required to recognize revenue, combining and modifying contracts, and the implementation of the revenue procedures. The content further presents topics including other presentation matters, contract costs, and disclosures requirements surrounding revenue recognition in accordance with U.S. GAAP. This course provides guidance on the steps required to recognize revenue, recognition of performance obligations satisfied over time or at a point in time, understanding when contracts should be combined, and identifying how contract modifications affect revenue recognition. This course is most beneficial to professionals new to revenue recognition who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to revenue recognition.

By the end of this course, participants should be able to:

- identify contracts with customers
- describe the steps required for revenue recognition
- recognize contract modifications
- identify required disclosures for revenue recognition

Revenue Recognition for NFPs

23-WB-236-TR

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Update

Kurt Oestricher, CPA discusses how nonprofits account for revenue under Topic 606 and ASU 2018-08.

By the end of this course, participants should be able to:

- identify differences in the accounting for nonprofits and nonpublic companies
- identify the appropriate accounting guidance
- distinguish between a contribution and an exchange.

Accounting

Revenue Recognition Step 1 **New!**

23-NA-009-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

Under the guidance issued by the Financial Accounting Standards Board in 2014 the revenue recognition literature moved from over 100 pieces of literature to a single new topic in the Codification, Topic 606. Under this new guidance we've moved from a realization model to a transfer of control model. In this course, we look at Step 1 of the guidance-identifying the contract.

By the end of this course, participants should be able to:

- identify if the criteria for step one of the revenue model have been met.

Revenue Recognition Step 2 **New!**

23-NA-010-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

This course looks at step two of the revenue recognition model under ASC Topic 606. That step concerns identifying a performance obligation

By the end of this course, participants should be able to:

- determine a performance obligation.

Revenue Recognition Step 3 **New!**

23-NA-011-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

Determining the transaction price might seem relatively simple, however, lots of factors may enter into the determination.

By the end of this course, participants should be able to:

- identify the factors used in determining the transaction price.

Revenue Recognition Step 4 **New!**

23-NA-012-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

ASU 2014-09 on revenue from contracts with customers was issued several years ago moving to a five-step model for recognition. Step 4 relates to the allocation of prices to performance obligations, which means it's closely related to Step 2, identifying performance obligations. This course looks at the impact of Topic 606 on allocating the price to performance obligations.

By the end of this course, participants should be able to:

- determine how to allocate prices to various performance obligations.

Revenue Recognition Step 5 **New!**

23-NA-013-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

Topic 606 moved revenue recognition from the earned and realized model to a 5 step process tied to transfer of control. Step 5 of this model looks at recognition of revenue. The entity must determine in step 5 if control is transferred at a point in time or over time in meeting the performance obligations. This course looks at step 5 and the determination of when to recognize revenue.

By the end of this course, participants should be able to:

- determine when and how control is transferred and revenue is recognized.

Tax Credit Accounting for Tax Equity Investors

23-WB-115-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this course, KPMG professionals discuss the accounting for tax credits allocated to tax equity investors, including when applying the proportional amortization method as amended by ASU 2023-02. Topics include:

- investors in tax credit structures (ASC 323 and ASC 740)
- proportional amortization method (ASU 2023-02).

By the end of this course, participants should be able to:

- recall the accounting for tax credits allocated to tax equity investors, including when applying the proportional amortization method as amended by ASU 2023-02.

Note: This course is based on a live webcast that took place on August 2, 2023.

Sale-Leaseback Transactions, Build-to-Suit Arrangements and Other Select Topics

21-WB-404

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

Sale-Leaseback Transactions, Build-to-Suit Arrangements, and Other Select Topics is the fourth of four in-depth courses in our series, which addresses the key requirements of the FASB's new lease accounting standard (Topic 842).

This fourth course covers some of the key aspects of the standard related to both lessee and lessor accounting, including:

- subleases
- sale-leaseback accounting
- build-to-suit considerations
- leases acquired in a business combination.

By the end of this course, participants should be able to:

- define key aspects of the standard that relate to sale-leaseback transactions and build-to-suit arrangements
- identify potential changes to accounting practice for lessees and lessors, based on ASC 842 implementation
- identify the potential implications of ASC 842 on their accounting practices.

SEC Comment Letter Trends **New!**

23-WB-120-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss recent themes and trends in comment letter activity from the SEC and areas of focus on the horizon. Topics include:

- recent general trends and observations in SEC comment letters
- discussion of recent accounting SEC comment letters
- discussion of recent regulatory SEC comment letters.

By the end of this course, participants should be able to:

- recall the focus of the SEC when performing reviews of filings.

Note: This course is based on a live webcast that took place on October 26, 2023.

Accounting

SEC Update 2023

23-WB-101-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Update

In this course, KPMG professionals discuss recent activity of the SEC, including implementation questions and other issues important to registrants.

Topics include:

- AICPA & CIMA Conference highlights regarding SEC developments
- recent observations on the adoption of new SEC rules
- update on SEC rulemaking activities
- update on the SEC's areas of focus in ESG
- what to expect in 2023.

By the end of this course, participants should be able to:

- recognize the implications of rules and guidance recently issued by the SEC to understand the impact of disclosure trends on year-end filings.

Segment Reporting Under ASC 280

19-WB-105-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

KPMG professionals discuss segment reporting under ASC 280.

Topics include:

- identifying the CODM
- identifying operating segments
- determining reportable segments
- segment disclosures
- FASB project update: segment reporting.

By the end of this course, participants should be able to:

- identify issues related to segment reporting under ASC 280.

Statement of Cash Flows: Latest Issues

22-WB-106-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

This course features KPMG professionals from the Department of Professional Practice discussing the latest issues impacting the statement of cash flows. Topics include:

- impact of the Russia-Ukraine War on cash and cash equivalents
- classification of funds held for others
- classification of cryptocurrencies
- classification issues relating to share-based payments
- non-GAAP reporting measures
- recent SEC comments.

By the end of this course, participants should be able to:

- identify the basic requirements in Topic 230
- recall the classification of cash and cash equivalents
- recognize the classification of funds held for others in the statement of cash flows
- recall the classification of cryptocurrencies in the balance sheet
- recognize the classification issues related to share-based payments
- identify the basic presentation requirements related to non-GAAP measures.

Note: This course is based on a live webcast that took place on May 11, 2022.

Statement of Cash Flows: Practical Issues

21-WB-112-WC

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

KPMG professionals discuss practical issues impacting the statement of cash flows.

Topics include:

- recap on ASC 230 requirements
- cash equivalents and restricted cash balances
- financing cash flows from revolving and structured payables
- cash flows from capitalized costs such as cloud computing and in-process R&D costs
- cash flows from government grants.

By the end of this course, participants should be able to:

- recall practical issues impacting the statement of cash flows.

Stock Compensation Attribution and Modifications

19-WB-210

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Intermediate

This course addresses the requirements of ASC 718, introducing key terms and dates in a common share-based payment award, the various types of vesting conditions included in these contracts and the impact of each on the recognition compensation expense. You will also learn about how to properly account for modifications to awards. The course concludes with a summary of various required disclosures.

By the end of this course, participants should be able to:

- distinguish between the key dates associated with a typical share-based payment award
- identify the various vesting conditions typically contained in share-based payment awards
- determine how compensation cost should be recognized for awards with different vesting conditions
- determine the impact of forfeitures on the accounting for share-based payment awards
- determine the impact of modifications on the accounting for share-based payment awards.

Accounting

Stock Compensation Scope Classification and Measurement 19-WB-209

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Basic

This course explores the scope of ASC 718, how to classify awards within scope as either equity-classified or liability-classified, and basic measurement techniques and key inputs when determining the fair value of awards. Many entities enter into share-based payment awards with their employees for a variety of reasons and determining whether these awards should be classified as a liability or equity can involve judgment.

By the end of this course, participants should be able to:

- recall the various types of share-based payment awards issued by entities
- differentiate when an award is granted to an employee or a nonemployee
- recognize the criteria necessary for a share-based payment award to employees to be considered non-compensatory
- determine whether an award is compensatory or non-compensatory
- distinguish share-based payment awards to employees as either equity-classified or liability-classified
- identify common inputs for various pricing models when determining the fair value of awards
- determine the impact that changing an input would have on the fair value of an award.

The Evolving Crypto Landscape

23-WB-400

Field Of Study: Accounting

CPE Credits: 1.00

Level of Knowledge: Intermediate

From NFTs to crypto asset staking, liquidity pools and other decentralized finance (DeFi) activities, the crypto asset landscape continues to evolve and expand. This course includes:

- a refresh on accounting for crypto assets
- recent SEC, FASB and IASB activity
- emerging hot topics.

By the end of this course, participants should be able to:

- recall crypto accounting basics (as GAAP currently stands)
- recognize some of the latest innovations and evolutions in the world of crypto assets
- recognize key accounting and reporting considerations that companies should be aware of if they venture into these emerging areas
- recognize recent crypto asset activities of the FASB, IASB and SEC.

Note: This course is based on a live session that took place on December 2, 2022.

The Need for New Accounting Guidance for Digital Assets **New!** 23-NA-019-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Overview

To date, no accounting standard addresses the economics and nuanced nature of the digital asset. This course discusses one type of digital asset – crypto assets – and the accounting for such assets. The course explores the challenges associated with the current accounting framework for crypto assets and a potential roadmap to address the need for authoritative guidance on the broader topic of digital assets.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- discuss crypto assets and their challenges associated with the current accounting framework.

Understanding and Analyzing Financial Statements

23-WB-124-TR

Field Of Study: Accounting

CPE Credits: 3.00

Level of Knowledge: Basic

Current and potential employees, lenders, and shareholders read company financial statements with a different goal or purpose in mind. They use financial statements in a variety of ways, seeking information specific to their needs. This course provides an overview of the basic financial statements and how to interpret the information presented within the statements and footnotes. Since there are many financial statement users, the course is designed for both accountants and nonaccountants alike.

This basic level course is most beneficial to professionals new to this topic who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- describe income statements
- present comprehensive income
- identify balance sheets
- summarize statements of changes in owners' equity
- describe statements of cash flows
- define ratio analysis.

Accounting

Understanding Greenhouse Gas (GHG) Emissions – Scopes 1, 2 and 3

23-CU-301

Field Of Study: Specialized Knowledge

CPE Credits: 2.00

Level of Knowledge: Basic

This course is designed to provide learners with an understanding of GHG emissions, how organizations contribute to climate change and how GHG inventories are developed. This curriculum includes six required microlearning courses and an exam.

By the end of this course, participants should be able to:

- identify the seven main types of GHGs
- identify the three types of anthropogenic (human) activities that lead to GHG emissions
- recall the GHG classifications as published by Greenhouse Gas Protocol (GHGP)
- recognize the four types of scope 1 emissions (mobile, process, stationary and fugitive)
- identify the ways in which organizations produce scope 1 emissions
- identify opportunities for organizations to reduce scope 1 emissions
- list the four forms of scope 2 emissions (electricity, steam, heat and cooling)
- identify the differences between location-based and market-based emissions reporting
- identify the ways in which organizations produce scope 2 emissions
- list opportunities to reduce scope 2 emissions
- recall the 15 categories of scope 3 emissions
- recognize the time boundaries of the 15 categories of scope 3 emissions
- identify the ways in which organizations produce scope 3 emissions
- list opportunities to reduce scope 3 emissions
- list the five principles of GHG accounting and reporting
- identify the steps for creating a GHG inventory
- list the GHG emissions calculation components
- recall how to set GHG emissions targets and monitor GHG emissions data against set targets.

Valuation Methods – The Normalization of Earnings

23-WB-012-TR

Field Of Study: Accounting

CPE Credits: 2.00

Level of Knowledge: Basic

An important step in the business valuation process is the normalization of earnings. Many companies subject to business valuations are smaller, closely held companies. It is not unusual for such organizations to treat various financial items differently than the publicly held companies chosen as comparables. Thus, earnings often need to be normalized in order to make an effective comparison. Even when market or income business-valuation approaches are used, normalization adjustments are frequently needed for the financial statements of closely held companies.

This basic level course is most beneficial to professionals new to this topic who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- describe the normalization of earnings
- demonstrate the normalization of earnings.

What are Financial Instruments

23-NA-001-TR

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

Whether it's writing off credit losses or hedging risk, it's always helpful to know if the contract you are dealing with is a financial instrument. This course provides examples of a variety of different types of financial instruments to help the user determine does a particular piece of accounting guidance apply or not. This course is most beneficial to those with some accounting or finance experience.

By the end of this course, participants should be able to:

- recognize what is a financial instrument.

What is a Balance Sheet Updated!

23-NA-002-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

Along with the income statement and the statement of cash flows, the balance sheet is one of the main financial statements of a business. This course outlines what a balance sheet is. This basic level course is most beneficial to professionals new to this topic who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- identify a balance sheet.

What is a Lease Term New!

23-NA-014-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

This 10-minute course introduces lease term. Although this concept may sound easy and straight-forward, this course introduces factors to be considered when determining a lease term.

By the end of this course, participants should be able to:

- recognize factors that must be considered when determining a lease term.

What is a Lease New!

23-NA-015-CL

Field Of Study: Accounting

CPE Credits: 0.20

Level of Knowledge: Basic

This 10-minute course explores the definition of a lease under ASC 842. It explores the concepts of identified asset, control, and substantive substitution rights.

By the end of this course, participants should be able to:

- recognize key components that qualify a contract to be defined as a lease.

Accounting

What to Know Before You Go on Crypto

21-WB-120-WC

Field Of Study: Accounting

CPE Credits: 1.50

Level of Knowledge: Basic

Crypto market capitalization has reached more than \$2 trillion. So what do we need to know before we go on Crypto?

In this course, KPMG professionals discuss (1) some of the key accounting, reporting and other considerations companies should contemplate before they expand their use of and/or investments in cryptocurrencies and (2) some of the latest innovations and developments in the crypto space.

By the end of this course, participants should be able to:

- identify the accounting considerations for companies using crypto assets.

Note: This course is based on a live session that took place on November 17, 2021.

What is Profitability

22-NA-005-TR

Field Of Study: Accounting

CPE Credits: 0.17

Level of Knowledge: Basic

Financial ratios offer a company's stakeholders a way to evaluate and compare their performance against other similar businesses in their industry. Ratios measure the relationship between two or more components of financial statements. In general, financial ratios can be broken down into main categories, such as profitability or return on investment, liquidity, debt or leverage, market, and operating or efficiency – with several specific ratio calculations prescribed within each. This short course will focus on the most common profitability ratios. This basic overview may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- identify and use the most common profitability ratios.

Auditing

Analytical Fraud Detection

22-WB-222-TR

Field Of Study: Auditing

CPE Credits: 4.00

Level of Knowledge: Basic

Fraud detection consists of the procedures or actions undertaken to ascertain that a fraud has been committed. Being aware of how to actively search for fraud is one of the best ways to detect it. This course focuses on analytical procedures as ways to uncover fraud. It discusses cash flow analysis as well as horizontal and vertical analyses, organizational or related-party relationships, and personal conduct, lifestyle, and corporate culture analyses. This course meets the requirements to qualify for California: Detection and/or Reporting of Fraud category.

This course is most beneficial to professionals new to analytical fraud detection who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this subject.

By the end of this course, participants should be able to:

- discuss different types of analytical procedures
- recognize relationships with external parties
- identify personal conduct, lifestyle, and corporate culture assessments
- summarize various fraud cases
- identify analytical procedures used to detect fraud.

COSO 2013: Framework Components, Principles, and Points of Focus

17-WB-109

Field Of Study: Auditing

CPE Credits: 3.00

Level of Knowledge: Basic

This course equips participants with an awareness of COSO's 2013 Framework, which emphasizes the requirements for determining what constitutes effective internal control. It provides participants with in-depth knowledge of the Framework and its five components (Control Environment, Risk Assessment, Control Activities, Information and Communication, and Monitoring Activities) and the associated 17 principles. This course also covers the Framework within the context of an internal control over financial reporting (ICFR) assessment, where the objective is reliable financial reporting and the preparation of financial statements in accordance with U.S. GAAP.

By the end of this course, participants should be able to:

- recall key concepts related to the COSO 2013 Framework
- identify the five principles that support the 7 Control Environment COSO component, including the related points of focus
- identify the four principles that support the Risk Assessment COSO component, including the related points of focus
- identify the three principles that support the Control Activities COSO component, including the related points of focus
- identify the three principles that support the Information and Communication COSO component, including the related points of focus
- identify the two principles that support the Monitoring Activities COSO component, including the related points of focus.

Counteracting Unconscious Bias in Audits

21-NA-006-TR

Field Of Study: Auditing

CPE Credits: 0.20

Level of Knowledge: Overview

Psychology research suggests that factors in the audit setting create cognitive biases that can reduce the auditor's likelihood of following up on client explanations with additional evidence. Cognitive biases often represent unconscious, systemic influences affecting how individuals gather and interpret information when forming judgments and decisions. This course discusses some ways of reducing this unconscious bias in audits.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- discuss ways of counteracting unconscious bias in audits.

Introduction to Information Produced by the Entity

20-WB-402

Field Of Study: Auditing

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides foundational concepts of IPE for control owners and testers who are new to the area or might need a refresher on the use of IPE within an organization's controls.

By the end of this course, participants should be able to:

- recognize IPE and the importance of IPE used in the operation of a control
- identify IPE elements
- recall control owner responsibilities when relying on IPE during execution of a control
- recall control tester responsibilities for IPE.

Introduction to Internal Control over Financial Reporting

16-WB-106

Field Of Study: Auditing

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides participants with a context and background for internal controls, an understanding of the differences between an integrated audit and a financial statement audit, and an overview of typical components of an ICFR Framework.

By the end of this course, participants should be able to:

- recall the ICFR background, historical and contextual information
- contrast an integrated audit with a financial statement audit
- recall why Internal Controls exist, including General Computer Controls (GCCs)
- identify components of an ICFR Framework:
- compliance roles and responsibilities
- self-assessment process
- ICFR program management
- documentation tool.

Introduction to Management Review Controls

20-WB-401

Field Of Study: Auditing

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides foundational concepts on MRCs for control owners and testers in an Internal Control Over Financial Reporting (or ICOFR) program.

By the end of this course, participants should be able to:

- recognize the importance of Management Review Controls (MRCs)
- identify the key elements to consider when designing MRCs
- recall the importance of information used in MRCs
- list documentation requirements and considerations for MRCs
- recall the purpose, approach and results of testing MRCs.

Auditing

Introduction to Processes, Risks, and Controls

17-WB-110

Field Of Study: Auditing

CPE Credits: 2.00

Level of Knowledge: Basic

This course provides context to and an awareness of processes, risks, and controls within an organization's operations. This foundational course highlights the importance of understanding the overall business process in order to recognize its risks and to identify and test controls to mitigate those risks.

The course also introduces participants to risk considerations related to fraud. Fraud awareness is highlighted to provide participants with knowledge that will help them identify potential fraud areas when evaluating risks.

By the end of this course, participants should be able to:

- recognize how enterprise risk management and COSO influence an organization's processes, risks, and controls
 - define a business process
 - recognize various types of risks
 - identify various types of controls
 - identify fraud categories, drivers, and prevention and detection methods.
-

Monitoring Internal Control

23-WB-232-TR

Field Of Study: Auditing

CPE Credits: 3.00

Level of Knowledge: Basic

This program seeks to convey the importance of an effective monitoring system for an entity's system of internal control. The program will break down the four key elements of establishing an internal control baseline and provide useful tools to build a proper foundation for effective monitoring. We will look at how to prioritize risk and evaluate the different types of information monitoring provides and close the program with a discussion of how to address and report the results of the monitoring process. This basic level course is most beneficial to professionals new to this subject who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- identify the purpose of monitoring internal control effectiveness
 - recognize the four key elements of establishing an internal control monitoring baseline
 - identify the purpose and impact of Internal Control Over Financial Reporting Guidance for Smaller Companies
 - recognize the structure of internal control systems
 - recognize the four steps used by evaluators to design their monitoring activity
 - identify controls and information
 - recognize the three attributes related to monitoring from COSO's guidance for smaller companies
 - identify the concept of applying prioritization and communication of results.
-

Understanding GHG Scope 3 Categories **New!**

23-CU-302

Field Of Study: Audit

CPE Credits: 2.00

Level of Knowledge: Overview

This 11-part curriculum on scope 3 greenhouse gas emissions provides an overview of scope 3 greenhouse gas emissions related to each applicable category as noted in the GHG-Protocol, including information on the applicable standards, data, and methodologies used to calculate these emissions.

By the end of this course, participants should be able to:

- describe each Scope 3 categories minimum boundary
 - relate each Scope 3 category to the applicable entities
 - list applicable standards and other considerations
 - describe the types and sources of data and methodologies used to calculate emissions.
-

Behavioral Ethics

Exploring the Value of Ethical Culture – Global Business Ethics Survey Series (Part 1)

21-WB-570

Field Of Study: Behavioral Ethics

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, Pat Harned (CEO of the Ethics and Compliance Initiative [ECI]) and Scott Essex (KPMG's Chief Ethics & Compliance Officer) discuss the five key trends from the Global Business Ethics Survey and explore the value of ethical culture.

This course is one of four electives in the Global Business Ethics Survey series based on longitudinal research from the ECI:

- Exploring the Value of Ethical Culture – Global Business Ethics Survey Series (Part 1)
- Pressure in the Accounting Profession – Global Business Ethics Survey Series (Part 2)
- Misconduct and the Role of Internal Audit – Global Business Ethics Survey Series (Part 3)
- Reporting and Retaliation Are on the Rise – Global Business Ethics Survey Series (Part 4)

By the end of this course, participants should be able to:

- identify ethical culture trends from the Global Business Ethics Survey
- define what it means to have an ethical culture
- explain how ethical culture is relevant to the accounting profession
- recognize the role of leaders and employees in shaping an organization's ethical culture
- define the components of a high-quality ethics and compliance program and how they influence ethical culture.

Misconduct and the Role of Internal Audit – Global Business Ethics Survey Series (Part 3)

21-WB-572

Field Of Study: Behavioral Ethics

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, Pat Harned (CEO of the Ethics and Compliance Initiative [ECI]) and Angela Rodin and Omid Yazdi (KPMG partners) discuss the Global Business Ethics Survey finding that observed misconduct is increasing and explore the role of internal auditors in identifying the elements that give rise to misconduct.

This course is one of four electives in the Global Business Ethics Survey series based on longitudinal research from the ECI:

- Exploring the Value of Ethical Culture – Global Business Ethics Survey Series (Part 1)
- Pressure in the Accounting Profession – Global Business Ethics Survey Series (Part 2)
- Misconduct and the Role of Internal Audit – Global Business Ethics Survey Series (Part 3)
- Reporting and Retaliation Are on the Rise – Global Business Ethics Survey Series (Part 4)

By the end of this course, participants should be able to:

- recall the ECI's definition of misconduct
- identify trends about the reporting of misconduct
- recognize the opportunity internal auditors have to identify early indicators of degradation in ethical culture
- recognize how close collaboration between internal audit and other oversight partners can support the "virtuous circle."

Pressure in the Accounting Profession – Global Business Ethics Survey Series (Part 2)

21-WB-571

Field Of Study: Behavioral Ethics

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, Pat Harned (CEO of the Ethics and Compliance Initiative [ECI]) and Robin Valentine and Nancy Miller (KPMG leaders) discuss the Global Business Ethics Survey finding that pressure to compromise standards is increasing and explore what that means for the accounting profession.

This course is one of four electives in the Global Business Ethics Survey series based on longitudinal research from the ECI:

- Exploring the Value of Ethical Culture – Global Business Ethics Survey Series (Part 1)
- Pressure in the Accounting Profession – Global Business Ethics Survey Series (Part 2)
- Misconduct and the Role of Internal Audit – Global Business Ethics Survey Series (Part 3)
- Reporting and Retaliation Are on the Rise – Global Business Ethics Survey Series (Part 4)

By the end of this course, participants should be able to:

- recognize how pressure to compromise standards can lead to unethical decision-making
- identify pressures affecting accounting professionals
- list safeguards and strategies individuals and organizations can use to respond to pressures.

Reporting and Retaliation are on the Rise – Global Business Ethics Survey Series (Part 4)

21-WB-573

Field Of Study: Behavioral Ethics

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, Pat Harned (CEO of the Ethics and Compliance Initiative [ECI]) and Scott Essex and Angela Rodin (KPMG Chief and Deputy Chief Ethics and Compliance Officers) discuss the Global Business Ethics Survey findings that while the reporting of misconduct is increasing, levels of workplace retaliation for reporting are also on the rise.

This course is one of four electives in the Global Business Ethics Survey series based on longitudinal research from the ECI:

- Exploring the Value of Ethical Culture – Global Business Ethics Survey Series (Part 1)
- Pressure in the Accounting Profession – Global Business Ethics Survey Series (Part 2)
- Misconduct and the Role of Internal Audit – Global Business Ethics Survey Series (Part 3)
- Reporting and Retaliation Are on the Rise – Global Business Ethics Survey Series (Part 4)

By the end of this course, participants should be able to:

- identify trends on reporting of misconduct and retaliation
- explain why reporting is important for a strong ethical culture
- identify ways leaders can encourage others to report, or support them once they do
- list strategies to prevent retaliation against those who report misconduct.

Business Law

Harassment in the Workplace

23-WB-237-CL

Field Of Study: Business Law

CPE Credits: 1.00

Level of Knowledge: Overview

This course contains fundamental concepts on preventing discrimination and harassment in the U.S. It is intended for all employees and managers that work in the U.S. This course examines the types of workplace conduct that are considered unlawful discrimination and harassment. It explains what employees should do to avoid or minimize incidents of discrimination and harassment in the workplace. It is recommended as a training tool to reduce the risk of legal liability that employers face for violations of federal, state, and local workplace discrimination and harassment laws. This course satisfies the sexual harassment training requirements for Delaware and Illinois.

By the end of this course, participants should be able to:

- define discrimination and harassment
 - recognize discriminatory and harassing conduct
 - demonstrate adherence to applicable anti-discrimination and anti-harassment laws
 - describe how to respond to incidents of discrimination and harassment.
-

Harassment in the Workplace for Managers

23-WB-238-CL

Field Of Study: Business Law

CPE Credits: 2.00

Level of Knowledge: Overview

This course examines the types of workplace conduct that are considered unlawful discrimination and harassment. It explains what employees, including supervisors and managers, should do to avoid or minimize incidents of discrimination and harassment in the workplace. It is recommended as a training tool to reduce the risk of legal liability that employers face for violations of federal, state, and local workplace discrimination and harassment laws. This course satisfies the sexual harassment training requirements for Delaware and Illinois.

By the end of this course, participants should be able to:

- recall the relevant federal, state, and local laws related to harassment and how laws determine liability for discrimination and harassment
 - recite the conduct that should be prohibited in any organization's harassment policies as well as the duties such policies should impose on supervisory employees
 - describe your role in preventing discrimination and harassment
 - express the ability to respond appropriately when misconduct is observed or when an employee complains about discrimination or harassment-type conduct
 - identify retaliation and express how to avoid it.
-

Business Management & Organization

Employing Members of the Largest Generation

22-WB-016-TR

Field Of Study: Business Management & Organization

CPE Credits: 3.00

Level of Knowledge: Basic

Millennials are the largest generation in the workforce, which means accounting offices need to recruit, engage, and retain this generation to succeed. This course looks at the unique attributes of Millennials and how businesses can leverage those preferences to their advantage. Topics include the Millennial point of view, Millennials at work, finding Millennial job candidates, what Millennials look for in an employer, ways to keep Millennials engaged, and how businesses can improve their physical office space to be more appealing to this generation.

By the end of this course, participants should be able to:

- recognize the common characteristics of the Millennial generation, as well as the strengths they bring to and the challenges they face in the workplace
- identify the best ways to find Millennial job candidates and what they look for in a potential employer
- determine methods for keeping Millennial employees engaged and the different types of workspaces that appeal to them.

Financial Statement Analysis for Profit Improvement

23-WB-168-CL

Field Of Study: Business Management and Organization

CPE Credits: 6.00

Level of Knowledge: Basic

Financial statement analysis is an art much more than a science. As such, it can generate the opportunity to be creative and innovative. Finding the real operational problems through financial statement analysis within an organization can be exceedingly difficult. Sometimes only a creative approach will cause discovery of that seminal or core problem-causing issue. This course gives participants familiarity with some techniques and approaches to help determine the operational problems through effective financial statement analysis within an organization and recommends ways to remedy such problems. This analytical course is most beneficial to professionals new to the concept of financial statement analysis who may be at the staff or entry level, but it may also benefit an experienced professional with limited exposure to this topic and its applications.

By the end of this course, participants should be able to:

- identify the process of preparation of financial statements in various formats
- increase understanding of the relationship between financial statements and operating procedures
- recognize the impact of financial statement analysis on operations
- identify some of the tools and techniques used in the financial analysis process
- identify some of the available financial ratios to assist in such analysis
- determine how financial and operating data can be utilized for more effective decision-making activities within the organization

Fraud in the Remote Workplace

23-NA-007-TR

Field Of Study: Business Management & Organization

CPE Credits: 0.20

Level of Knowledge: Overview

The way we do business has forever changed due to COVID-19. Many professions have changed how they provide their service from education to healthcare and beyond. One of the most significant changes is the transition to remote work. Businesses around the world are adopting new work-from-home policies. Even after the pandemic crisis is over, many companies will adopt a hybrid work environment, where employees will be allowed to work from home at least for a couple of days a week. As remote work finds a permanent home in the workplace, organizations are opening themselves to fraud due to the remote work environment. Though remote work can leave organizations open to fraud, they can take measures to minimize their risk. This course gives a basic overview of how organizations can mitigate fraud risk in the remote work environment.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- identify ways organizations can mitigate fraud risk in a remote work environment.

Manage Disruption: Disruption in the Business Environment Updated!

19-WB-800

Field Of Study: Business Management and Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course identifies and discusses disruptive factors in the business environment, and how this disruption impacts today's businesses. An understanding of these issues is essential for finance professionals as trusted advisors and partners to senior managers from across the business and as providers of information to other stakeholders.

By the end of this course, participants should be able to:

- recognize the disruptive factors within the business environment that are prompting change
- recognize the impact of disruptive forces on businesses and the Finance function
- identify the impact disruption could have on your enterprise or organization, including the Finance function.

Manage Disruption: Emerging Roles and Competencies Updated!

19-WB-802

Field Of Study: Business Management and Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course focuses on the roles and competencies required by the Finance function of the future. By understanding the roles required to support the finance value chain, finance professionals can assess the skills and competencies required in order to drive value throughout the organization.

By the end of this course, participants should be able to:

- recognize the underlying competencies, skills, and capabilities of a future Finance function
- identify the emerging roles required within a future Finance function
- review your Finance team's ability to drive value in your organization and assess the needs for development.

Business Management & Organization

Manage Disruption: Transformation of the Finance Function **Updated!** 19-WB-801

Field Of Study: Business Management and Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course focuses on how disruption in the business environment is changing the fundamental purpose of the Finance function. The role of finance continues to evolve, as organizations adapt to the increasingly volatile business environment. This course also considers how the role of finance is driving change across the organization, and the need for the finance function to leverage technology.

By the end of this course, participants should be able to:

- recognize how the fundamental purpose of finance is evolving
- recognize the role of finance in driving change
- recognize the need for the Finance function to leverage technology
- identify opportunities for your Finance team to contribute to value creation in your enterprise/organization.

Managing an Accounting Department

23-WB-119-TR

Field Of Study: Business Management and Organization

CPE Credits: 3.00

Level of Knowledge: Basic

This course introduces administration of an accounting department in a small- to medium-sized entity. Topics include evaluating the effectiveness and efficiency of the operations, the accounting system, the coordination of tasks and responsibilities, as well as managing the accounting department staff. This course also takes a look at the billing cycle and recommendations for successful credit and collections along with processing accounts payable and recommendations for controlling expenses. And, finally, opportunities for improving the efficiency of the general ledger closing process are addressed. This basic level course is most beneficial to professionals who want to ensure their accounting department is being managed efficiently and effectively.

By the end of this course, participants should be able to:

- evaluate the staffing, process and procedures of an accounting department
- draft an effective employee manual
- identify the most appropriate methods to recruiting, hire, retain and train qualified staff
- evaluate the performance of staff in the accounting department
- identify the process for managing payroll
- recognize an efficient and effective billing cycle
- evaluate the credit and collections process
- process accounts payable while controlling cash flow.

Managing Working Capital

23-NA-008-TR

Field Of Study: Business Management and Organization

CPE Credits: 0.2

Level of Knowledge: Overview

Regardless of a company's size or industry sector, working capital is a critical financial metric. Working capital is the capital used in a company's day-to-day operations. While a business needs to have enough working capital to pay for inventory, operating expenses, unexpected needs, and short-term debt, excessive investment in cash and liquid assets may not be the best use of a company's resources. Companies need to manage a delicate balance between these two seemingly opposing positions. This course gives a basic overview of working capital management.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- identify steps to successful working capital management.

Process Flowcharting

16-WB-117-MSO

Field Of Study: Business Management & Organization

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides professionals who are new to flowcharting with the skills

knowledge needed to effectively use flowcharts as a tool to clearly depict process activities, including key risk areas and controls. As a result of this training, learners should be able to guide the development of flowcharts and perform an effective review of the flowchart document.

By the end of this course, participants should be able to:

- define process flowcharting
- define the value of process flowcharting
- select the correct flowchart symbols.

Project Management Essentials for the CPA

23-WB-167-TR

Field Of Study: Business Management & Organization

CPE Credits: 2.00

Level of Knowledge: Basic

In this introductory course, we will discuss the basic essentials of project management. We will start with the definition of what a project is and what it is not. We will go on to discuss the project management process, the project plan, directing and managing project execution, monitoring and controlling the project, and closing the project.

By the end of this course, participants should be able to:

- define a project and explain the role of the project manager
- discuss the key elements of project initiation and prepare a project statement of work
- identify the phases in the project management plan
- describe project execution and manage stakeholder expectations
- define and explain the importance of scope, schedule and cost
- evaluate project performance and employ project closing tools and techniques.

Transform Skills: Business Skills **Updated!**

20-WB-809

Field Of Study: Business Management & Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course will enable you to understand how business skills are changing to adapt to the future of finance. You will learn how to acquire these skills and engage in them on the job.

By the end of this course, participants should be able to:

- recognize which business skills will be affected by changes to the future of finance
- identify each of the business skills and how to engage in them on the job
- recall why each skill is important and potential ways of acquiring these new skills
- recognize how to apply business skills to your own work and build multidisciplinary teams that work cross-functionally.

Business Management & Organization

Transform Skills: Digital Skills **Updated!**

20-WB-812

Field Of Study: Business Management & Organization

CPE Credits: 3.00

Level of Knowledge: Basic

This course will enable you to understand how digital skills are changing to adapt to the future of finance. You will learn how to acquire these skills and engage in them on the job.

By the end of this course, participants should be able to:

- recognize which digital skills will be affected by changes to the future of finance
- identify each of the digital skills and how to engage in them on the job
- recall why each skill is important and potential ways of acquiring these new skills
- recognize how to apply digital skills to your own work and build multidisciplinary teams that work cross-functionally.

Transform Skills: Leadership Skills **Updated!**

20-WB-811

Field Of Study: Business Management & Organization

CPE Credits: 1.50

Level of Knowledge: Basic

This course will enable you to understand how leadership skills are changing to adapt to the future of finance. You will learn how to acquire these skills and engage in them on the job.

By the end of this course, participants should be able to:

- recognize which leadership skills will be affected by changes to the future of finance
- identify each of the leadership skills and how to engage in them on the job
- recall why each skill is important and potential ways of acquiring these new skills
- recognize how to apply leadership skills to your own work and build multidisciplinary teams that work cross-functionally.

Transform Skills: People Skills **Updated!**

20-WB-810

Field Of Study: Business Management & Organization

CPE Credits: 3.00

Level of Knowledge: Basic

This course will enable you to understand how people skills are changing to adapt to the future of finance. You will learn how to acquire these skills and engage in them on the job.

By the end of this course, participants should be able to:

- recognize which people skills will be affected by changes to the future of finance
- identify each of the people skills and how to engage in them on the job
- recall why each skill is important and potential ways of acquiring these new skills
- recognize how to apply people skills to your own work and build multidisciplinary teams that work cross-functionally.

Transform Skills: Technical Skills **Updated!**

20-WB-808

Field Of Study: Business Management & Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course will enable you to understand how technical skills are changing to adapt to the future of finance. You will learn how to acquire these skills and engage in them on the job.

By the end of this course, participants should be able to:

- recognize which technical skills will be affected by changes to the future of finance
- identify each of the technical skills and how to engage in them on the job
- recall why each skill is important and potential ways of acquiring these new skills
- recognize how to apply technical skills to your own work and build multidisciplinary teams that work cross-functionally.

Transform Skills: The Changing Role of the CFO **Updated!**

20-WB-807

Field Of Study: Business Management & Organization

CPE Credits: 3.50

Level of Knowledge: Basic

This course will enable you to understand the evolving role of the CFO. You will recognize the competencies finance teams will require in the future and how to implement a comprehensive talent strategy.

By the end of this course, participants should be able to:

- recognize the disruptors and challenges faced by businesses today
- identify the impact these disruptors are having on finance organizations
- recognize the evolving role of CFOs in organizations
- recall the capabilities needed in finance organizations in the future
- identify how to prioritize and plan the finance organization's transformation journey.

Ignite Change: The Build Objective **Updated!**

19-WB-803

Field Of Study: Business Management & Organization

CPE Credits: 3.50

Level of Knowledge: Basic

This course identifies how the finance organization is going to change as a result of technology and how that changes the workforce associated with it. The focus is on using technology for business solutions that enables the organization to understand data as efficiently as possible.

When you complete this course, you will be able to:

- recognize the technology components included in an integrated finance technology design
- identify the capabilities being delivered by Finance in the Build objective of the finance value chain
- recognize the underlying competencies and skills needed specific to the Build objective
- recognize the type of roles present in the Build objective and the related financial processes.

Business Management & Organization

Ignite Change: The Engage Objective Updated!

19-WB-804

Field Of Study: Business Management & Organization

CPE Credits: 3.00

Level of Knowledge: Basic

This course identifies how the finance organization is going to change as a result of technology and how that changes the workforce associated with it. The focus is on how to engage with the business and how to influence the business to do things differently.

By the end of this course, participants should be able to:

- identify the capabilities being delivered by Finance in the Engage objective of the finance value chain
- recognize the underlying competencies and skills needed specific to the Engage objective
- recognize the type of roles present in the Engage objective and the related financial processes.

Ignite Change: The Plan Objective Updated!

19-WB-805

Field Of Study: Business Management & Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course identifies how the finance organization is going to change as a result of technology and how that changes the workforce associated with it. The focus is on how to understand the finances of the organization collectively to ensure accurate planning for the future.

By the end of this course, participants should be able to:

- identify the capabilities being delivered by Finance in the Plan objective of the finance value chain
- recognize the underlying competencies and skills needed specific to the Plan objective
- recognize the type of roles present in the Plan objective and the related financial processes.

Ignite Change: The Run Objective Updated!

19-WB-806

Field Of Study: Business Management & Organization

CPE Credits: 2.50

Level of Knowledge: Basic

This course identifies how the finance organization is going to change as a result of technology and how that changes the workforce associated with it. The focus is on driving value through efficiency and running the finance team.

By the end of this course, participants should be able to:

- identify the capabilities being delivered by Finance in the Run objective of the finance value chain
 - recognize the underlying competencies and skills needed specific to the Run objective
 - recognize the type of roles present in the Run objective and the related financial processes.
-

Communications and Marketing

Effective Problem Solving **New!**

23-WB-275-CL

Field Of Study: Communications and Marketing

CPE Credits: 1.00

Level of Knowledge: Basic

In a single day, you will be bombarded with countless choices. With each choice, a decision needs to be made. For each decision made, there are consequences. These consequences could be positive or negative, small or large, inexpensive or costly. Their ramifications could be short-lived or long-lasting. The more penetrating and long-lasting the ramifications are, the more important it is to make the best decision possible. This course outlines the steps to effective problem solving and the techniques to successful brainstorming. This basic level course is most beneficial to professionals new to this topic who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- recognize effective problem-solving techniques.

Keeping Emails, Texts, and Tweets Professional **New!**

23-WB-277-CL

Field Of Study: Communications and Marketing

CPE Credits: 2.00

Level of Knowledge: Basic

Have you ever sent an e-mail in haste and then regretted it after getting responses asking for clarity? Do you know the law related to sending commercial email? Has a blog or post on a social media site left you cringing because what you meant wasn't what the reader understood? In business, communication is critical. Most communication is sent and received in short bytes whether in writing, e-mail or on some form of social or professional media network platform. Writing effectively for these platforms requires the skill to fully grasp being concise and understanding the habits and needs of the reader. This course presents some suggestions for writing strong short business communications, how to engage the reader, writing with impact and the value of proofreading before sending an electronic message or posting to a social media web site. This course is most beneficial to professionals new to business communication who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to different platforms for effective professional communication.

By the end of this course, participants should be able to:

- identify the most effective way to engage the reader when writing email
- recall some basic spelling and grammar rules that are often violated in the haste to fire off quick emails or social media posts
- recognize the pitfalls of misusing words or making spelling and grammar errors in email or on social media.

Powerful Presentations **Updated!**

23-WB-175-CL

Field Of Study: Communications and Marketing

CPE Credits: 5.00

Level of Knowledge: Basic

Speaking before a group can be daunting, but using the right techniques can make the presentation a success. This course helps improve skills and confidence in speaking before groups. It focuses on content and delivery techniques enhancing presentation power and impact. Other topics include tailoring presentations to the audience, organizing around themes, using visual aids effectively, preparing and rehearsing, and controlling question and answer sessions.

By the end of this course, participants should be able to:

- organize a presentation
- recognize the use of substance and punch in a presentation
- identify effective visual aids
- determine a range of delivery techniques
- recall methods to control the question and answer session as well as group meetings

Computer Software & Applications

Creating and Formatting Excel Charts

22-WB-029a-TR

Field Of Study: Computer Software and Applications

CPE Credits: 3.00

Level of Knowledge: Intermediate

Creating and Formatting Excel Charts is a three-chapter intermediate-level course for Microsoft Excel that guides you using a variety of tools to create and format different types of charts. To get the most out of this course, the learner must have the Microsoft Excel application accessible on the computer being used. This intermediate-level course is most appropriate for professionals with detailed knowledge in this topic or the professional seeking to expand their knowledge base and who may be at a mid-level position within an organization with operational or supervisory responsibilities, or both.

By the end of this course, participants should be able to:

- identify chart elements and chart types
- recognize tools used to create basic charts and change chart types
- identify tools to make more advanced charts such as Stack Area and exploded 3-D Pie charts.

Increasing Productivity with Excel Formulas and Functions

22-WB-253-TR

Field Of Study: Computer Software and Applications

CPE Credits: 4.00

Level of Knowledge: Intermediate

This course is an intermediate-level course for Microsoft Excel that guides you through creating, copying, pasting, reviewing, and correcting basic and complex formulas. This course is most beneficial to professionals who use Excel on a regular basis and would like to learn how formulas and functions can increase their efficiency. This intermediate level course is most appropriate for professionals with detailed knowledge in this topic or professionals seeking to expand their knowledge base and who may be at a mid-level position within an organization with operational or supervisory responsibilities, or both.

By the end of this course, participants should be able to:

- identify basic formula and function syntax and tools used to create formulas
- recognize methods to link worksheets, create 3-D formulas, recognize defined names as function arguments
- identify and correct common formula errors.

Microsoft Excel – Useful Functions for CPAs

22-WB-251a-TR

Field Of Study: Computer Software and Applications

CPE Credits: 2.00

Level of Knowledge: Basic

Microsoft Excel – Useful Functions for CPAs is a one-chapter intermediate-level course that guides you through creating formulas using Financial, Date and Time, Math and Trig, Statistical, Lookup and Reference, Database, Text, and Logical functions. This intermediate-level course is most appropriate for the professional with detailed knowledge in this topic or the professional seeking to expand their knowledge base and who may be in a mid-level position within an organization with operational or supervisory responsibilities.

By the end of this course, participants should be able to:

- identify multiple ways to create a formula using one or more functions
- recognize methods to create formulas using specific Financial, Date and Time, Math and Trig, Statistical, Lookup, Database, Text, and Logical functions.

Spreadsheet Best Practices – Roadmap to Reduced Risk

22-WB-014-TR

Field Of Study: Computer Software & Applications

CPE Credits: 1.00

Level of Knowledge: Basic

Spreadsheet models and reports are powerful tools that provide analytical insight and assist in key decision-making processes throughout all organizations, small, mid-sized enterprises, and global multinational firms. Spreadsheets provide extraordinary versatility that enables functional groups with a wide variety of data analytics to drive organizational excellence. This course provides essential techniques to minimize the human risks associated with the use of spreadsheets. This course is beneficial to professionals new to spreadsheet models and reports, who may be at the staff or entry level in the organization, but also for a seasoned professional with limited exposure to this subject.

By the end of this course, participants should be able to:

- identify how to enhance spreadsheet controls with configurations and review techniques
- recognize the best practices to mitigate risks associated with the use of spreadsheets
- protect and safeguard confidential, private, and sensitive data in spreadsheets for regulatory compliance and security.

Finance

Accelerating Your Digital Agenda

22-WB-407

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Basic

In this course, KPMG professionals discuss strategic factors to consider when scaling digital solutions, priorities to action your digital agenda, and how to capitalize on essential “accelerators” to drive successful transformation.

Topics include:

- new digital business models and revenue streams
- making the right investments in innovation
- creating seamless digital customer experiences.

By the end of this course, participants should be able to:

- recognize leading practices companies can use to accelerate their digital agendas.

Note: This course is based on a live session that took place on November 18, 2021.

Capital Budgeting and Management

22-WB-115-TR

Field Of Study: Finance

CPE Credits: 2.00

Level of Knowledge: Basic

This course presents the basic premise of capital management and capital budgeting through valuable metrics used in managing working capital. The topic of metrics is expanded with an explanation of major capital investment evaluation techniques for capital analysis and assessments to include the time value of money, net present value, payback period, internal rate of return, modified rate of return and the profitability index. Formulas and tools for efficient and accurate calculation is also provided.

This course is most beneficial to professionals new to capital budgeting as well as for the seasoned professional with limited exposure to capital budgeting.

By the end of this course, participants should be able to:

- identify key terms related to capital management
- identify metrics used in managing working capital
- identify key metrics used in a capital budget
- utilize some calculation formulas used common in capital budgeting decisions
- recognize policies and procedures relative to capital expenditures
- identify the benefits of having predefined capital expenditure policies and procedures.

ESG for CFOs: What You Need to Know

21-WB-103-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Basic

Research indicates that informed customers are more interested in buying from sustainable companies than ever before. Organizations with a reputation for having environmentally sustainable, socially responsible, and good corporate governance practices outperform their competitors.

During this webcast, KPMG executives discuss:

- the role that finance plays in driving awareness of Environmental, Social, and Governance (ESG) data and its financial value
- how to effectively measure sustainability to help demonstrate your company's commitment to ESG
- the key benefits of reporting on your organization's reputation for ESG sustainability
- the common challenges organizations face with reporting on and measuring ESG value across all three components.

By the end of this course, participants should be able to:

- identify why finance is uniquely positioned to help organizations identify, report on, and drive ESG commitments

Elevating Finance: The CFO Agenda (Episode 1) **New!**

23-WB-106-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

Finance functions are increasingly challenged to evolve from being back-office support to becoming strategic advisors that are uniquely positioned to lead enterprise performance. This course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage. Topics include:

- disruption as the new norm
- the rapidly changing finance landscape
- the CFO agenda for "Elevating Finance"
- a roadmap to a future-ready finance organization.

By the end of this course, participants should be able to:

- articulate how to turn disruption into competitive advantage
- describe ways of monetizing investments in digital, data and talent
- identify how enabling innovation and organizational agility will help to drive sustainable, profitable growth
- articulate the importance of managing enterprise risks in order to maintain stakeholder trust.

This is the first of six courses that make up the Elevating Finance series.

The second course highlights how the digital technology landscape is enabling finance and discusses the digital core and enabler environment supporting the transformation

The third course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization

The fourth course explores ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise

The fifth course presents ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions

The sixth course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy.

Note: This course is based on a live webcast that took place on July 28, 2022.

Finance

Elevating Finance: Digital Acceleration (Episode 2) **New!**

23-WB-107-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

Technology and digital acceleration are key to Finance being future-ready, enabling value creation driven by information agility and dynamic insights. This course highlights how the digital technology landscape is enabling Finance and discusses the digital core and enabler environment supporting the transformation. Topics include:

- the CFO agenda for "Elevating Finance"
- the digital core
- modern digital enablers.

By the end of this course, participants should be able to:

- recall the digital core and enabler environment
- recognize how to enable the finance function through digital technology
- identify the importance of embracing digital and embedding it into culture
- recognize fit-for-purpose solutions across finance processes.

This is the second of six courses that make up the Elevating Finance series.

The first course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage

The third course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization

The fourth course explores ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise

The fifth course presents ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions

The sixth course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy.

Note: This course is based on a live webcast that took place on August 18, 2022.

Elevating Finance: Strategy & Innovation (Episode 3) **New!**

23-WB-108-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

Finance leaders are uniquely positioned to play a critical role in driving business strategy and innovation investments by taking advantage of signals of change and prioritizing opportunities to unlock sustainable value. This course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization. Topics include:

- the CFO agenda
- elevating the role of finance in strategy and innovation
- the value management life cycle
- beginning the journey.

By the end of this course, participants should be able to:

- recognize finance's role in creating, integrating and realizing enterprise value
- identify how CFOs can leverage data as a competitive advantage to enable value creation
- recognize finance's role in integrating enterprise processes and driving enterprise performance
- recall a framework to drive and deliver continuous value realization to the organization.

This is the third of six courses that make up the Elevating Finance series.

The first course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage

The second course highlights how the digital technology landscape is enabling finance and discusses the digital core and enabler environment supporting the transformation

The fourth course explores ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise

The fifth course presents ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions

The sixth course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy.

Note: This course is based on a live webcast that took place on September 22, 2022.

Finance

Elevating Finance: Data Intelligence (Episode 4) **New!**

23-WB-109-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

The demand of the digital economy and the need to accelerate transformation has led to a more strategic role for the finance organization. Organizations are now looking to leverage advanced data and analytics to drive innovation, address business challenges with the aid of new technology and establish a competitive advantage over peers. This course highlights ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise. Topics include:

- the CFO agenda
- elevating the role of finance in strategy and innovation
- establishing governance framework over data.

By the end of this course, participants should be able to:

- discuss how finance is uniquely positioned to influence data for the enterprise
- identify key objectives for a data strategy leading to actionable insights
- recognize why finance must empower their people to unlock the potential of data
- recall the importance of having a governance framework over data.

This is the fourth of six courses that make up the Elevating Finance series.

The first course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage

The second course highlights how the digital technology landscape is enabling finance and discusses the digital core and enabler environment supporting the transformation

The third course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization

The fifth course presents ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions

The sixth course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy.

Note: This course is based on a live webcast that took place on October 27, 2022.

Elevating Finance: Dynamic Risk Management (Episode 5) **New!**

23-WB-110-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

Now is the time to elevate Finance to a more dynamic capability that rapidly adopts new tools and competencies while fueling digital transformation. The promises of digitized finance are very real: reduced costs, near-real-time reporting, better insights, exception-based analytics and a more empowered workforce. This course highlights ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions. Topics include:

- disruption is everywhere
- the CFO agenda for "Elevating Finance"
- trust to disrupt
- automate where it matters.

By the end of this course, participants should be able to:

- determine how to embrace agility to proactively respond to external disruption
- identify the critical elements required for a risk function to preserve value while strengthening trust across stakeholders
- recall Finance's role in enabling a culture that turns risks into opportunities
- demonstrate how to leverage digital solutions, data and analytics to proactively assess and mitigate risk.

This is the fifth of six courses that make up the Elevating Finance series.

The first course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage

The second course highlights how the digital technology landscape is enabling finance and discusses the digital core and enabler environment supporting the transformation

The third course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization

The fourth course explores ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise

The sixth course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy.

Note: This course is based on a live webcast that took place on January 26, 2023.

Finance

Elevating Finance: Modern Workforce (Episode 6) **New!**

23-WB-111-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

As digital innovation becomes a necessary part of an organization's DNA, CFOs are rethinking their approach to building a high-performing finance organization to drive long-term value. This course discusses how finance organizations can drive organizational agility by optimizing service delivery and redefining their talent strategy. Topics include:

- keeping up with the roaring pace of change
- enabling a modern finance workforce
- the modern talent agenda.

By the end of this course, participants should be able to:

- recognize how Finance can drive organizational agility by optimizing its delivery of services
- identify how technology advancements are elevating the value of services delivered
- recall the new and evolving roles of Finance beyond value preserver to performance driver and strategic advisor
- demonstrate how to transform talent strategy to retain high-potential (hi-po) talent and optimize the value of employees' performance.

This is the sixth of six courses that make up the Elevating Finance series.

The first course provides insights from recent KPMG global surveys and highlights critical enablers that are enabling finance leaders to turn disruption into a competitive advantage

The second course highlights how the digital technology landscape is enabling finance and discusses the digital core and enabler environment supporting the transformation

The third course discusses finance's evolving role in driving enterprise performance and a framework to drive and deliver continuous value realization to the organization

The fourth course explores ways to unlock the potential of data and discusses how finance can use data intelligence to create value across the enterprise

The fifth course presents ways to overcome macro disruption in the marketplace, as well as an approach to proactively manage risks by leveraging digital solutions.

Note: This course is based on a live webcast that took place on February 23, 2023.

Financial Answers to Common Pricing Issues

23-WB-223-CL

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Overview

If you're like most people, one of the first things you notice about a product is its price. While you may base your final purchasing decision on the overall benefits offered by the product, you'd likely compare the price with your perceived value of the product. If the price is too high, the company may lose your business. If the price is too low, the company can experience significant negative consequences. Setting the wrong price can bring about the downfall of a company. Finding that balance between meeting customer expectations and supporting a healthy profit margin for the business is the focus of this course.

This overview level course provides a general review of this topic from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- identify various price strategies for setting the right price for products.

Financing a Start Up Business

22-WB-132-TR

Field Of Study: Finance

CPE Credits: 2.00

Level of Knowledge: Basic

Starting a new business, expanding an existing business or furthering the efforts of a nonprofit organization all require money. Financing any of these would be easy if there is a bank account with unlimited funds from which to draw. But, in most cases, financing is an issue with risks attached. Before one can reap the rewards of entrepreneurship, identifying the most appropriate source of financing is critical. This course explores some of the basic methods of financing a fledgling business, expansion of an existing business as well as offering some tips on finding grant funds for nonprofit ventures. This course is most beneficial to professionals new to business financing options who may be at the staff or entry level in organization but also for an experienced professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- recognize the different sources for financing a new business as well as funding business expansion
- identify the process for grant application in order to fund a nonprofit venture.

Financial Management Basics

22-WB-230-TR

Field Of Study: Finance

CPE Credits: 3.00

Level of Knowledge: Basic

The Financial Management Basics course introduces the essential elements needed to understand the financial concepts required to manage a business. It provides an in depth explanation of strategic thinking and the basics of managing risk. The course provides the importance of managing working capital and cash management. The course describes the elements of creating a capital structure and the requirements for obtaining long and short-term financing for the business. Mergers and acquisitions are a component of financial management and the course describes the key elements and types of mergers and why they are a component of business strategy and operations. Finally, the course discusses and describes the elements and techniques for operational planning and analysis, including budgeting and financial forecasting techniques. This course is appropriate for beginning staff and those new to the finance role.

By the end of this course, participants should be able to:

- identify basic principles and concepts used and applied in the financial management of a business.

GenAI for Finance Leaders **New!**

23-WB-117-WC

Field Of Study: Finance

CPE Credits: 1.00

Level of Knowledge: Intermediate

In this course, KPMG professionals discuss how leading finance organizations are sharpening their focus on emerging generative AI (GenAI) technology to achieve new levels of automation and optimization. While the promise of GenAI is real, thoughtful planning, digital literacy and careful risk mitigation will be imperative to accelerating its adoption and delivery value. Topics include:

- how GenAI impacts your workforce
- building a responsible AI
- unlocking the potential of GenAI in finance
- discovering GenAI, from media buzz to business value.

By the end of this course participants should be able to:

- recall how leading organizations are exploring the use of GenAI in finance
- identify the critical considerations for leaders to implement AI responsibly
- determine how GenAI impacts the workforce.

Note: This course is based on a live webcast that took place on July 20, 2023.

Finance

The Transition to Alternate Risk-Free Rates (RFRs)

20-WB-703

Field Of Study: Finance

CPE Credits: 0.50

Level of Knowledge: Basic

This course provides an overview of the transition away from the London Interbank Offering Rate (LIBOR), the impacts and challenges of transitioning to alternate risk-free rates (RFRs), and how companies can prepare for the transition.

By the end of this course, participants should be able to:

- explain the basic principles of LIBOR's history, challenges, and the case for change
 - identify major phases in the global transition timeline
 - describe the impact and implications of the transition on key industries and clients
 - recognize the need for transition planning
 - describe the focus areas organizations need to consider as part of transition planning and execution.
-

Information Technology

Agile Overview

20-WB-306

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Overview

If you are agile enough to adapt to ever-changing market trends, you might be able to deliver something truly innovative. In order to do so, that agility must be pervasive, right down to the project management method you use; this is where the Agile methodology comes in. This course provides an overview of the various Agile approaches and compares them to the traditional (waterfall) approach to help you recognize projects that may be better suited for Agile.

By the end of this course, participants should be able to:

- recognize the Agile Manifesto and Agile Principles
- identify the various Agile approaches and roles
- identify the activities involved in the Agile method
- determine where the Agile approach is better suited.

ChatGPT Writes Things, But Is It Right for You New!

23-WB-282-CL

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

Although the concept of artificial intelligence (AI) dates back to the 1950s, it took until 2023 for a wave of AI tools to crash onto the scene. The leader of the pack currently seems to be ChatGPT, and since it was released to the public, people have been playing with it for fun and experimenting with it for work purposes. Some attempts to deploy ChatGPT and other AI tools are obviously destined for failure or silliness, while others bring up even more questions. The best attempts, however, will lead to much-needed efficiency improvements. In this course, we will share foundational knowledge about AI and explore this new wave of AI tools to help you understand how AI will impact the future of your practice, your clients, and maybe your life.

By the end of this course, participants should be able to:

- recognize vocabulary, common uses, and a basic set of potential benefits from and drawbacks to using generative AI
- determine when and how to use generative AI in professional projects and settings
- understand the evolution of generative AI and the differences between what is actually new and what is more established technology

Common Digital Data Collection Methods New!

23-NA-021-CL

Field Of Study: Information Technology

CPE Credits: 0.20

Level of Knowledge: Overview

Data collection is an important part of the research process and digital data collection has become increasingly popular in recent years due to the many advantages it offers over traditional paper-based data collection methods. This short course gives an overview of some common digital data collection methods.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- discuss some common digital data collection methods.

Components of IT Infrastructure New!

23-WB-271-CL

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Overview

Information technology plays a vital role in today's wireless world. Simply put, the work of most organizations would slow to a crawl without functioning IT systems. A well-designed and maintained IT infrastructure is crucial for the efficient functioning of an organization, enabling seamless communication, data processing, storage, and access to information. It supports business operations, enhances productivity, facilitates collaboration, and enables the implementation of new technologies and applications. Therefore, auditors must understand their client's IT infrastructure to successfully audit its structure. This course provides a basic overview of the key components of the IT infrastructure.

This overview-level course provides a general review of this topic from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- describe an IT infrastructure and its key components.

Cyber Liability New!

23-WB-272-CL

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

There is no doubt that the Internet has revolutionized the workplace. It has expanded and complicated the types of organizations and businesses that have emerged, how we conduct business, and with whom we do business; and it has impacted a myriad of other factors in our lives whether we are working or at leisure, whether we are at an office, at home, or on an island halfway around the world. This course presents some of the rules, regulations, and standards that influence how we conduct ourselves online, describes some of the potential liabilities that arise by doing business online, and offers some best practices that might help to mitigate potential exposure.

By the end of this course, participants should be able to:

- identify the rules and regulations that create liabilities for online individuals and businesses
- determine best practices to help mitigate potential exposure to liabilities.

Cyber Security to Protect Your Company and Your Clients

22-WB-012-TR

Field Of Study: Information Technology

CPE Credits: 2.00

Level of Knowledge: Basic

Cybercrime has become an epidemic. Hackers are ramping up the cyber war, downloading software used to attack against commercial companies. Federal law enforcement officials have made clear the risks posed by cybercrime. Stolen secret government documents have the potential to place American lives at risk, threaten the country's infrastructure and national security. This course highlights the role of government, the increasing number of laws and regulations, illustrate leading frameworks and standards that a person or business should implement as cybersecurity controls and countermeasures. This course also describes methods and practices to safeguard company assets and data via strategic, tactical and operational management. This course is most beneficial to professionals new to cyber security who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to computer system vulnerabilities.

By the end of this course, participants should be able to:

- define the terms used in on-line activity and transactions
- determine the value of cyber security and the consequences of weak cyber security
- identify different types of computer crime and cyber schemes.

Information Technology

Data Backup Basics **New!**

23-WB-273-CL

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

In an increasingly digitized business landscape, data backup is critical for the survival of an organization. Data backup is the practice of copying data from a primary to a secondary location, to protect it in case of a disaster, accident, or malicious action. This process is pivotal to a successful disaster recovery plan. This short course gives an overview of the data backup process.

This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- discuss the relevance and steps of data backup.

How Does Blockchain Work **New!**

23-NA-018-CL

Field Of Study: Information Technology

CPE Credits: 0.20

Level of Knowledge: Basic

This course looks at the technical manner in which Blockchain (distributed ledger) technology works.

By the end of this course, participants should be able to:

- identify the method and cost of transactions using blockchain.

Internet of Things – Marketplace Trends

20-WB-304

Field Of Study: Information Technology

CPE Credits: 1.50

Level of Knowledge: Basic

This course provides an overview of the Internet of Things (IoT) marketplace trends. In particular, this course presents a high-level overview of what IoT is, why it is significant, and potential applications within corporate environments.

By the end of this course, participants should be able to:

- define the Internet of Things (IoT)
- identify the technologies required to deliver IoT
- identify opportunities for organizations to leverage IoT
- recognize IoT use cases
- identify IoT-related risks.

IT Fundamentals Chapter 1: An Introduction to IT

20-WB-710

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

This course is part of the IT Fundamentals series, which focuses on foundational IT concepts that describe how technology works in a corporate environment, how technology affects company processes, and the potential IT risks for consideration within IT environments.

By the end of this course, participants should be able to:

- recognize the impact of IT on business
- explain how these concepts influence technology risks.

This course is the first of three courses that make up the IT Fundamentals series.

- IT Fundamentals Chapter 2: Applications, Databases, and Operating Systems defines what applications, databases, and operating systems are, how they are used within corporate environments, and how these concepts influence the risks we expect to find.
- IT Fundamentals Chapter 3: Connectivity and Networking describes basic concepts related to connectivity and networking, as well as the risk considerations and impact on the business.

IT Fundamentals Chapter 2: Applications, Databases, and Operating Systems

20-WB-711

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

This course is part of the IT Fundamentals series, which focuses on foundational IT concepts that describe how technology works in a corporate environment, how technology affects company processes, and the potential IT risks for consideration within an IT environment.

By the end of this course, participants should be able to:

- define what applications, databases, and operating systems are and how they are used
- explain how these concepts influence the risks to consider.

This course is the second of three courses that make up the IT Fundamentals series.

- IT Fundamentals Chapter 1: An Introduction to IT provides an overview of how technology works in a corporate environment and how it can create risks for businesses.
- IT Fundamentals Chapter 3: Connectivity and Networking describes basic concepts related to connectivity and networking, as well as the risk considerations and impact on the business.

IT Fundamentals Chapter 3: Connectivity and Networking

20-WB-712

Field Of Study: Information Technology

CPE Credits: 0.50

Level of Knowledge: Basic

This course is part of the IT Fundamental series, which focuses on foundational IT concepts that describe how technology works in a corporate environment, how technology affects company processes, and the potential IT risks for consideration within an IT environment.

By the end of this course, participants should be able to:

- define basic concepts related to connectivity and networking
- identify risk considerations and the impact on the business.

This course is the third of three courses that make up the IT Fundamentals series.

- IT Fundamentals Chapter 1: An Introduction to IT provides an overview of how technology works in a corporate environment and how it can create risks for businesses.
- IT Fundamentals Chapter 2: Applications, Databases, and Operating Systems defines what applications, databases, and operating systems are, how they are used within corporate environments, and how these concepts influence the risks we expect to find.

Information Technology

Storage Strategy in the Cloud

22-WB-101-TR

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Basic

If you work on multiple devices or from multiple locations, it is important that you have access to your data to get the job done correctly and efficiently. This course defines storage in the cloud and describes some of the uses, advantages, and disadvantages of using cloud storage. As a basic level course, it is designed to provide guidance to those learners who are new or relatively new to the world of cloud storage and provide suggestions and tips to those who are already familiar with cloud storage and all it has to offer. This course also presents issues related to an overall data protection strategy in the cloud.

By the end of this course, participants should be able to:

- assess the advantages and disadvantages of cloud storage solutions
- identify cloud storage, backup, file syncing, and disaster recovery options.

The Impact of Dark Web and Cybersecurity in Tax and Accounting

22-WB-229-TR

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Overview

With breaches commonplace, and more of our private, personal information on the Dark Web, the way we see, hold, and exchange information is about to change. In this course, we will dive into preventative measures that organizations can take to avoid a breach. We will review the challenges of cybercrime and the Dark Web. This overview course may be appropriate for professionals at all organizational levels.

By the end of this course, participants should be able to:

- recognize the technological challenges we are facing with cybersecurity and the Dark Web.

The Impact of Emerging Technology on Tax and Accounting **New!**

23-WB-279-CL

Field Of Study: Information Technology

CPE Credits: 1.00

Level of Knowledge: Overview

Do you ever wonder what impact emerging technology (Artificial Intelligence, Blockchain, and Virtual Reality) will have on your practice? This course identifies the technological revolution that is happening with emerging technology. It will go over the exponential impact of technology on the tax and accounting profession, while it recognizes the core components of Artificial Intelligence and how one can apply that to his/her practice. The author will outline various ways that blockchain technology will impact accounting; and explain how all of the emerging technologies will impact primary roles by providing additional opportunities to those that are early adopters of emerging technologies. This overview level course provides a general review of this topic from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- recognize the impact of emerging technology on the tax and accounting professions.

What Is Blockchain **New!**

23-NA-020-CL

Field Of Study: Information Technology

CPE Credits: 0.20

Level of Knowledge: Basic

Blockchain is a growing list of records called blocks. The digital ledgers involved are distributed and form the underpinning technology for bitcoin among other cryptocurrencies, but what is blockchain and why do so many think it will be so widely disruptive to the business world.

By the end of this course, participants should be able to:

- identify a purpose and benefit of blockchain.

Management Services

ESG and Internal Controls

21-WB-118-WC

Field Of Study: Management Services

CPE Credits: 1.50

Level of Knowledge: Basic

Over the past year, there has been increased focus on Environmental, Social & Governance (ESG) issues. As investors and rating agencies are demanding ESG reporting, the SEC and other agencies are focusing on the accuracy and transparency of disclosures as companies report on their ESG policies and practices.

There are some very clear parallels to SOX programs that companies would do well to consider as they develop internal controls related to ESG measurement and disclosure.

This course explores these similarities in light of the evolving role that internal control functions will play in the development of an organization's ESG strategy. Topics include:

- what ESG is and why it is now important to the risk function
- the changing ESG regulatory environment
- implementation approach
- internal control considerations
- example of ESG disclosures.

By the end of this course, participants should be able to:

- define the internal control considerations that factor into the development of an organization's ESG strategy.

Note: This course is based on a live webcast that took place on September 23, 2021.

ESG Fundamentals: Climate Risk Management

22-WB-400

Field Of Study: Management Services

CPE Credits: 1.50

Level of Knowledge: Intermediate

Climate change is rapidly emerging as a threat to the stability of our financial systems. More frequent and severe weather events are damaging infrastructure and disrupting supply chains.

Transition to a lower carbon economy is bringing new policies, regulations and rapid changes to market dynamics. And some carbon-intensive companies are already facing challenges over their contributions to climate change. Together, these trends threaten to bring serious financial risks to companies and their investors, lenders and insurers.

This course provides an overview of the effect of climate change on organizations and how to manage that risk. Topics include:

- major climate risk types
- common climate risk scenarios
- emerging regulatory standards and disclosure requirements
- green financing and capital markets.

By the end of this course, participants should be able to:

- recognize the effect of climate change on organizations and how to manage that risk
- define key concepts related to climate risk management
- identify why it is important to integrate climate risk management into the enterprise risk management framework.

ESG Fundamentals: Setting ESG Strategy

22-WB-402

Field Of Study: Management Services (Advisory Services)

CPE Credits: 1.00

Level of Knowledge: Intermediate

For more than two decades, companies have come under increasing pressure to incorporate ESG goals in their business. An increasing body of evidence indicates that companies can both do good and do well financially, which is contributing to a record number of companies setting out on their own "ESG journeys". The first step in an ESG journey is to level set and develop your strategy. In this course you will learn the key considerations in identifying your material ESG issues, including the basics of conducting materiality and maturity assessments on your journey to improve ESG performance.

By the end of this course, participants should be able to:

- identify the stages of setting an ESG strategy
- define key considerations in conducting maturity and materiality assessments
- recognize the benefits of developing a roadmap to achieve ESG goals.

Payments 101

20-WB-301

Field Of Study: Management Services

CPE Credits: 0.50

Level of Knowledge: Basic

This course provides a foundational understanding of the core elements of payments, how payments are defined in the marketplace, and why they are important to financial institutions.

By the end of this course, participants should be able to:

- identify basic elements, and types, of payments in today's business environment
- recognize various lenses to consider payment challenges faced by organizations
- recognize the impact of payments on an organization's bottom line
- recognize some of the most critical focus areas in the payments industry.

Personal Development

Change – The Only Constant **New!**

23-WB-270-CL

Field Of Study: Personal Development

CPE Credits: 2.00

Level of Knowledge: Basic

Change is part of our daily life. Ancient philosophers contemplated change. The normal of today was the change of yesterday. This course explores changes in technology and the workplace. It provides insights onto how people react to change, and gives tips on navigating change in the workplace. Statement of recent changes: This course has been designed to provide the learner with an overview of change in the workplace and techniques for navigating these changes. This basic level course is most beneficial to professionals who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- recognize innovative technologies and companies
- identify the impact that stress associated with change can have on our health
- determine strategies to help navigate change in the workplace.

Closing the IT Skill Gap for Accounting and Auditing Professions **New!**

23-NA-017-CL

Field Of Study: Personal Development

CPE Credits: 0.20

Level of Knowledge: Overview

Technology and data analytics are key components of modern accounting. CPAs need to adjust and acquire the skills and competencies the practice of accounting and auditing requires today and will require in the future. Because information technology has saturated all industries, learning more can promote personal development and help CPAs better assist their clients. One way to identify skill gaps in this area would be to conduct a skill gap analysis within their workforce. Once the gaps have been identified, a plan can be formed to close the skill disparity.

This overview-level course provides a general review of this topic from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- discuss the relevance of a skill gap analysis for information systems and controls.

Delegating to Financial Employees

22-WB-119-TR

Field Of Study: Personal Development

CPE Credits: 2.00

Level of Knowledge: Basic

Delegation is one of the most important skills a manager can possess. This course explores the reasons many managers cite for failure to delegate, and provides the manager with strategies to learn to delegate. In turn, the manager will ultimately become a better manager and develop more well-rounded employees.

This course is most beneficial to professionals new to delegation and management who may be at the staff or entry level in the organization but also for a seasoned professional with limited exposure to management and delegation.

By the end of this course, participants should be able to:

- recognize the reasons many managers fail to delegate
- determine the strategies for delegating to employees
- identify when to provide feedback to the employee.

Diversity and Inclusion in the Workplace **New!**

23-WB-274-CL

Field Of Study: Personal Development

CPE Credits: 1.00

Level of Knowledge: Basic

In today's workplace, organizations are comprised of a variety of races, cultures, religions, ages, and lifestyles that interact regularly, making workplace diversity training even more crucial. The norms that dictated behavior a half-century ago are transforming. To be successful in today's corporate environment, employers and employees must develop an awareness of diversity within their business through appropriate diversity training in the workplace. Proper training can assist organizations in this development.

Diversity in the workplace is apparent in everything from our names to the types of food we eat, and long-taboo subjects are now discussed freely. People with disabilities often work alongside openly gay co-workers, and various languages are spoken by employees and customers alike. Human conditions from obesity and dwarfism to mental and physical illness are treated with increasing sensitivity and openness.

By the end of this course, participants should be able to:

- recognize the importance of a diverse workplace
- recognize the need to give other employees the respect and dignity they deserve
- identify the characteristics protected by discrimination laws.

Essential Coaching Skills **Updated!**

23-WB-240-CL

Field Of Study: Personal Development

CPE Credits: 1.00

Level of Knowledge: Basic

Coaching is more than just managing. In fact, there are different types of styles of coaching including management coaching, performance coaching, as well as strategic human resource coaching. Each style requires unique skills to be effective. There are both direct and indirect benefits of coaching which can be rewarding for both the coach and the individual being coached. Coaching can create an effective framework for positive and productive change within an organization. An effective coaching session will be structured in a particular way with effective questioning techniques as well as an appreciation for the power of observation. This course delves into essential and effective coaching skills in order to improve communication, productivity, and efficiency in an organization. This course is most beneficial to professional new to managing a team who may be at the staff or entry level in an organization but also for a seasoned professional wanting to expand his or her exposure to coaching as a management style.

By the end of this course, participants should be able to:

- recognize the benefits of coaching
- identify effective questioning skills and describe how they are used during a coaching session

Personal Development

Introverts and Extroverts at Work

22-WB-249-TR

Field Of Study: Personal Development

CPE Credits: 2.00

Level of Knowledge: Basic

Introverts and extroverts are very different. Knowing what personality traits you have and which traits belong to your coworkers can go a long way toward a productive work environment. This course discusses the attributes of introverts and extroverts, demonstrates how to recognize the differences between the two, and identifies tips and techniques introverts and extroverts can use to improve their communication with each other. It also illustrates issues that introverts and extroverts face related to in-person and remote office communication and identifies strategies introverts and extroverts can use to resolve office conflict and management issues. Another personality type is the ambivert, which is described and defined in this course. This course will benefit not only professionals new to managing people at the staff or entry-level of an organization but also experienced professionals with limited exposure to management techniques.

By the end of this course, participants should be able to:

- recognize the differences between introverts and extroverts
- identify tips and techniques introverts and extroverts can use to improve their communication with each other
- recognize issues that introverts and extroverts may face related to in-person and remote office communication
- identify strategies introverts and extroverts can use to resolve office conflict and management issues.

Meetings that Matter

23-WB-002-CL

Field Of Study: Personal Development

CPE Credits: 1.00

Level of Knowledge: Basic

Look back at the meetings you have conducted or attended in the past couple of weeks. Think about any conference calls you were involved in recently. Were they productive, worthwhile components of your workday? Did they matter? If you are responsible for scheduling, conducting, or participating in any type of meeting, take some steps to make it more valuable for you and the other attendees. This course provides insight into holding effective meetings. It provides tips on preparing for and leading a meeting. In addition, it provides alternatives to the typical meeting in order to best use the time available. Follow the suggestions in this course to develop meetings that matter.

By the end of this course, participants should be able to:

- identify the pros and cons of scheduling a meeting
- recognize the components of a worthwhile meeting
- identify additional collaboration tools.

Moral Leadership and Character Development

23-WB-224-TR

Field Of Study: Personal Development

CPE Credits: 7.00

Level of Knowledge: Basic

During the past two decades, many corporate leaders have participated in fraudulent activities and the size of many scandals has been surprising. These revelations of corporate wrongdoing are very disheartening to a society that is built on a foundation of honesty and trust. In this course, you will examine personal character, the impact organizations have on character development, and the impact of moral leadership in organizations.

By the end of this course, participants should be able to:

- describe moral character
- understand character development
- identify ways to measure and predict honesty
- analyze the impact of moral leadership
- explain morality in organizations.

Negotiating Skills for CPAs Updated!

23-WB-013-CL

Field Of Study: Personal Development

CPE Credits: 2.00

Level of Knowledge: Basic

Skillfully conducted negotiations achieve better results. CPAs are often placed in the uncomfortable position of negotiating on behalf of their company or firm; therefore, it is essential that all CPAs are equipped with sophisticated, yet practical skills for winning negotiations while preserving relationships. This is particularly true in our current difficult and competitive business climate in which all parties in a negotiation tend to be unusually stressed. The focus will be on helping you become more strategic and productive in negotiations, which in turn should reduce your anxiety level. To accomplish this, the course will provide basic tools and suggest proven techniques that you can use immediately.

By the end of this course, participants should be able to:

- identify behavioral models for conflict situation
- recognize basic negotiating principles
- recognize BATNA
- recognize types of effective and useful questions

Sketchnoting – Visual Notes for Effective Meetings and Training Sessions

23-WB-020-TR

Field Of Study: Personal Development

CPE Credits: 1.00

Level of Knowledge: Overview

This fun and simple course explains the concept and techniques of sketchnoting as a method of taking notes. Techniques in this course are based on studies that prove that learners improve memory and recall by combining verbal and nonverbal information with images. Sketchnoting is as simple as doodling and does not require artistic skills. The professional who attends meetings, training sessions, conferences or reads professional literature can benefit from learning how to sketchnote. The tools needed are readily available and the techniques employed are as basic as being able to draw a square, triangle, rectangle, lines and dots. No longer must legal pads be filled with paragraphs and lists as take-aways from speaker presentations. Slide decks of presentations filled with information that is not applicable are unnecessary. Keeping it simple, learning to listen effectively to pick out just the important information is a skill that can be mastered and applied making sketchnoting a great alternative to other forms of recording presentation information and being able to recall and share key topics. This basic level course is most beneficial to professionals new to creatively taking notes who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- recognize the value of taking visual notes in the form of basic images connected with simple shapes
- identify techniques to create effective notes from training sessions, conferences, presentations, meetings and professional literature.

Personal Development

Stress Management **New!**

23-WB-278-CL

Field Of Study: [Personal Development](#)

CPE Credits: 1.00

Level of Knowledge: [Overview](#)

This course discusses stress, which is the most common word in today's fast-moving world. Stress needs to have tight reins to direct its direction. It can be good only if you know how to handle it. If you don't control it, it controls you. The moment you let go of its reins, you lose control. One example, which we've witnessed is the global impact of COVID-19. This pandemic has encompassed our lives and minds and has created stress that none of us can ignore.

This course provides a general review of stress management from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- recognize signs of stress
- describe stress management and learn how it can be managed.

Understanding EQ and IQ for Success **New!**

23-WB-280-CL

Field Of Study: [Personal Development](#)

CPE Credits: 1.00

Level of Knowledge: [Overview](#)

Learn the difference between Emotional Quotient (EQ) and Intellectual Quotient (IQ) and why both are needed for success. This course will cover the general measurement tools used to test both IQ and EQ and how you can leverage your strengths and work on any weaknesses. Intelligence is certainly a key factor in success but so is an individual's ability to interact with others which is an element of emotional intelligence. This course presents the components of emotional intelligence which can theoretically be measured in terms of an emotional quotient (EQ). As a comparison, an individual's intelligence quotient is outlined in a discussion of two popular IQ tests. This course provides a general review of emotional intelligence and IQ from a broad perspective. This course is appropriate for the professional at any organizational level.

By the end of this course, participants should be able to:

- recognize the elements of emotional intelligence
- determine the correlation between IQ and success
- compare the intelligence quotient and the emotional quotient.

Regulatory Ethics

2022 Ethics for Tennessee CPAs

22-WB-228-TR

Field Of Study: Regulatory Ethics

CPE Credits: 2.00

Level of Knowledge: Overview

2022 Ethics for Tennessee CPAs has been created solely from materials provided by the Tennessee Accountancy Board. This course designed to meet the biennial ethics requirement for Tennessee CPAs renewing their licenses. The course covers topics prescribed by the Tennessee Accountancy Board in their state-specific ethics outline and course materials. In addition to meeting the Accountancy Board requirements, this course is designed to provide the CPA with a guide for identifying, evaluating and dealing with ethical dilemmas as well as giving guidance on the laws, rules, and regulations that govern the CPA profession as well as the practical application of these rules in the daily operation of their businesses.

NOTE: This course is good through 03/31/2023 and must be completed by that date.

By the end of this course, participants should be able to:

- describe the Tennessee Board of Accountancy and its support staff, and outline recent and anticipated changes that affect Tennessee CPAs
- describe Tennessee rules and laws required for accounting licensure by the Tennessee State Board of Accountancy
- analyze and assess ethical situations and apply Tennessee rules and laws as appropriate to choose the best solution to the situation.

2022 Personal and Professional Ethics for Texas CPAs

22-WB-218-TR

Field Of Study: Regulatory Ethics

CPE Credits: 4.00

Level of Knowledge: Overview

This course is approved by the TSBPA to meet the requirements for ethical training. An individual applying for certification must complete a board approved ethics course no more than six months prior to submission of the application. Proof of completion of this course must be submitted with the application. Beginning on January 1, 2005, every licensee must take an ethics course that has been approved by the board, every two years. This course has been recently revised to include the most up-to-date changes in the Rules of Professional Conduct issued by the Texas State Board of Public Accountancy. In addition, this course contains enhanced coverage of important issues impacting the Rules of Professional Conduct as well as additional improvements in both form and content.

By the end of this course, participants should be able to:

- identify and discuss ways in which CPAs can go about achieving and maintaining high standards of ethical conduct
- examine the concepts of ethics and ethical reasoning and demonstrate the impact these concepts have on CPAs and the work they perform
- present and discuss the core values of the profession integrity, objectivity, and independence from both an ethical and rules-based point of view
- emphasize the responsibilities of CPAs to maintain and honor the public's trust
- clarify and demonstrate the manner in which the rules of professional conduct are intended to be applied by CPAs in a variety of professional situations
- discuss, through case analysis, the actions to be taken by CPAs when faced with ethical dilemmas in their professional careers.

- apply the AICPA Code of Professional Conduct to real life situations
- discuss the Oregon Revised Statutes and Administrative Rules
- discuss the Code of Professional Conduct adopted by the Board
- apply the laws, rules and regulations to real life situations.

Personal and Professional Ethics for Florida CPAs

23-WB-007-TR

Field Of Study: Regulatory Ethics

CPE Credits: 4.00

Level of Knowledge: Basic

This course has been approved by the Florida Board and it is good for the two-year period ending June 30, 2025. Personal and Professional Ethics for Florida CPAs is designed to meet the biennial ethics requirement for Florida CPAs renewing their licenses. In addition to meeting the Board of Accountancy requirements, this course is designed to give guidance on the laws, rules, and regulations that govern the CPA profession and the practical application of these rules in the daily operation of their businesses. Ethical behavior involves more than mere knowledge of right and wrong. It also involves the motivation to alter inappropriate behavior. Thus, an ethics course is only as good as its potential to motivate participants to think about their behavior and make change to that behavior when necessary. The course begins with a presentation of ethics and ethical reasoning. This material is designed to help participants better understand the impact ethics and ethical reasoning have on their personal lives and professional careers. The course is also designed to help participants recognize the need to make a periodic assessment of their behavior.

By the end of this course, participants should be able to:

- identify ways CPAs can achieve and maintain high standards of ethical conduct by examining the concepts of ethics and ethical reasoning and demonstrate the impact these concepts have on CPAs and the work they perform
- recognize the core values of the profession, integrity, objectivity, and independence, from both an ethical and a rules-based point of view, emphasizing the responsibilities of CPAs to maintain and honor the public's trust
- demonstrate the manner in which the AICPA Rules of Professional Ethics and Conduct are intended to be applied by CPAs in a variety of professional situations, discussing, through case analysis, the actions to be taken by CPAs when faced with ethical dilemmas in their professional careers
- identify the Florida Administrative Code, Regulations, and Rules governing Florida CPA licensees, and apply the code, regulations, and rules to real life situations.

Professional Ethics for Arizona CPAs

23-WB-219-TR

Field Of Study: Regulatory Ethics

CPE Credits: 4.00

Level of Knowledge: Overview

Professional Ethics for Arizona CPAs is designed to meet the biennial ethics CPE requirement for Arizona CPAs renewing their licenses. In addition to meeting State Board of Accountancy requirements, the course also includes materials to increase the CPA's understanding of ethics and enhance the learner's sensitivity towards accounting ethical issues and dilemmas that CPAs may face.

By the end of this course, participants should be able to:

- identify key elements of the AICPA Code of Professional conduct involved in ethical decision-making
- apply selected provisions of the Code including objectivity, due care, compliance with standards and competence
- apply ethics standards to practical situations
- apply the conceptual framework approach in the analysis and resolution of ethical dilemmas
- fulfill responsibilities described in the Arizona State Board and AICPA professional ethical standards.

Professional Ethics for Arizona CPAs – 2 hours

23-WB-220-TR

Field Of Study: Regulatory Ethics

CPE Credits: 2.00

Level of Knowledge: Basic

Professional Ethics for Arizona CPAs 2-hour version is designed to assist out-of-state CPAs in meeting the Arizona ethics CPE requirement. Please note: It is the CPA's responsibility to assure that the remaining two hours of the four hour ethics CPE requirement conform to the Arizona regulations for continuing professional education.

By the end of this course, participants should be able to:

- fulfill responsibilities described in the Arizona State Board and AICPA professional ethical standards.

Professional Ethics for Hawaii CPAs Updated!

23-WB-221-CL

Field Of Study: Regulatory Ethics

CPE Credits: 4.00

Level of Knowledge: Overview

Ethics for Hawaii CPAs is designed to meet the biennial ethics CPE requirement for Hawaii CPAs renewing their licenses. The course covers the areas of independence, integrity and objectivity, general standards and Hawaii accountancy statutes and administrative rules. In addition to meeting the State Board of Public Accountancy requirements, this course is designed to give guidance on the laws, rules, and regulations that govern the CPA profession and the practical application of these rules in the daily operation of their businesses.

By the end of this course, participants should be able to:

- discuss the AICPA Code of Professional Conduct
- apply the AICPA Code of Professional Conduct to real live situations
- discuss the Hawaii accountancy statutes and administrative rules

Specialized Knowledge

Cybersecurity: Foundational Concepts

22-WB-411

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

As technology evolves and rapidly changes the business environment, organizations need to make a continual effort to keep pace by embracing new technologies. And as organizations increasingly rely on these new technologies, they also need to be mindful of cybersecurity threats that could significantly impact the financials and reputation of the organization.

This course provides finance and accounting (F&A) professionals with foundational knowledge of cybersecurity standards and best practices used to protect the organization's assets. The roles and responsibilities of F&A professionals in cybersecurity are also discussed.

By the end of this course, participants should be able to:

- apply cybersecurity concepts and terminology in everyday conversations
- describe the Cybersecurity Framework for best practices and a plan of action
- identify why it is crucial for F&A professionals to learn about cybersecurity.

This is the first of four courses that make up the Cybersecurity: Navigating the Digital Era series:

The second course in the series gives participants the big picture: cybersecurity governance strategic planning, organizational structure, the establishment of roles and responsibilities, integration with the enterprise architecture, and the documentation of security objectives in policies and guidance.

The third course in the series provides finance and accounting (F&A) professionals with an overview of cybersecurity incident response and disclosure requirements. Also discussed: the topic of incident response and how F&A professionals can contain and remediate the loss caused by cybersecurity incidents and improve future cybersecurity effectiveness.

The fourth course in the series gives finance and accounting professionals an overview of the different roles and responsibilities of management, regulators, and auditors in cybersecurity disclosure.

Cybersecurity: Governance and Risk Environment

22-WB-412

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

As cybersecurity threats increase, organizations find it necessary to establish new policies to monitor these risks. These policies then lead to redefined roles and responsibilities within the organization.

This course provides the big picture: cybersecurity governance strategic planning, organizational structure, the establishment of roles and responsibilities, integration with the enterprise architecture, and the documentation of security objectives in policies and guidance.

By the end of this course, participants should be able to:

- identify roles and functions for cybersecurity governance and cybersecurity management
- describe finance and accounting professionals' responsibilities in cybersecurity management.

This is the second of four courses that make up the Cybersecurity: Navigating the Digital Era series:

The first course in the series provides finance and accounting professionals with foundational knowledge of cybersecurity standards and best practices used to protect the organization's assets.

The third course in the series provides finance and accounting (F&A) professionals with an overview of cybersecurity incident response and disclosure. Also discussed: the topic of incident response and how F&A professionals can contain and remediate the loss caused by cybersecurity incidents and improve future cybersecurity effectiveness.

The fourth course in the series gives finance and accounting professionals an overview of the different roles and responsibilities of management, regulators, and auditors in cybersecurity disclosure.

Cybersecurity: Planning Incident Responses

22-WB-413

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

As organizations increasingly rely on new technologies, stakeholders make a significant effort to understand the organization's cybersecurity issues and, thus, demand more information about cybersecurity risks and management.

This course provides finance and accounting (F&A) professionals with an overview of cybersecurity incident response and disclosure requirements. Also discussed: the topic of incident response and how F&A professionals can contain and remediate the loss caused by cybersecurity incidents and improve future cybersecurity effectiveness.

By the end of this course, participants should be able to:

- describe the process of cybersecurity response planning
- identify the steps F&A professionals need to take in incident risk assessment, remediation, and analysis.

This is the third of four courses that make up the Cybersecurity: Navigating the Digital Era series:

The first course in the series provides finance and accounting professionals with foundational knowledge of cybersecurity standards and best practices used to protect the organization's assets.

The second course in the series gives participants the big picture: cybersecurity governance strategic planning, organizational structure, the establishment of roles and responsibilities, integration with the enterprise architecture, and the documentation of security objectives in policies and guidance.

The fourth course in the series gives finance and accounting professionals an overview of the different roles and responsibilities of management, regulators, and auditors in cybersecurity disclosure.

Specialized Knowledge

Cybersecurity: Uncovering Regulations and Reporting **New!**

22-WB-414

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

As organizations increasingly rely on new technologies, cybersecurity incidents rise. Regulators, including the U.S. Securities and Exchange Commission, require companies to report protocols and cybersecurity incidents promptly. Consequently, many organizations face challenges in the disclosure of these incidents.

This course gives finance and accounting (F&A) professionals an overview of the different roles and responsibilities of management, regulators, and auditors in cybersecurity disclosure. Cybersecurity's ESG impact and ESG risk management strategies are discussed specifically since cyber risk is the most immediate and financially material sustainability risk that organizations face today.

By the end of this course, participants should be able to:

- identify the objectives of a cybersecurity risk management program
- list the key regulations and reporting frameworks, including ESG reporting frameworks, related to cybersecurity and consumer privacy.

This is the fourth of four courses that make up the Cybersecurity: Navigating the Digital Era series:

The first course in the series provides finance and accounting professionals with foundational knowledge of cybersecurity standards and best practices used to protect the organization's assets.

The second course in the series gives participants the big picture: cybersecurity governance strategic planning, organizational structure, the establishment of roles and responsibilities, integration with the enterprise architecture, and the documentation of security objectives in policies and guidance.

The third course in the series provides finance and accounting (F&A) professionals with an overview of cybersecurity incident response and disclosure requirements. Also discussed: the topic of incident response and how F&A professionals can contain and remediate the loss caused by cybersecurity incidents and improve future cybersecurity effectiveness.

ESG Value Creation

22-WB-403

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides an introduction to the concept of ESG value creation and explains the core business case for ESG investment. Over the past decade, ESG performance has become both a business imperative and a source of competitive advantage. In this course, we discuss the key drivers that are leading businesses to increase their focus on ESG as well as the central idea of ESG value creation: the integrated bottom line. This concept describes how businesses, through multiple avenues, can use ESG to enhance their profitability.

By the end of this course, participants should be able to:

- define ESG value creation and identify the business case for why it matters
- recognize the concept of the integrated bottom line and its benefits
- identify the external forces driving opportunities for ESG value creation.

Insider Threats – What Every Business Organization Should Know and Do **New!**

23-WB-276-CL

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

According to the 2023 IBM Cost of a Breach Report, remote working and digital transformation due to the COVID-19 pandemic, industry has seen notably higher average data breach costs. Massive cybersecurity breaches have become commonplace in the news headlines. It is of critical importance for an entity to examine how an inside threat could harm an organization, both in the short term and extending into the future. Does your entity have strong security preventative measures to protect company proprietary, confidential and sensitive data? If company data was exposed or stolen, it can significantly disrupt, harm the organization's operations or close the business. Insider threats by owners, executives and senior management have threatened the viability of a business before and post audits and regulatory inspections. Have violated company policy due to greed or power. This group of people t abused their authority. Internet and global digital commerce is widely adopted, insider threats will continue. In this course, we will identify the different types of insider threats to an organization. The course includes regulations, data vulnerabilities and best practices to prevent and monitor insider threats. This course will be beneficial to new professionals. staff or entry level in organization, but also for a seasoned professional with awareness of insider risk exposure and wish to learn leading practices to safeguard confidential data.

By the end of this course, participants should be able to:

- identify insider threats that have included executives, contractors, third parties, fraud, and white collar crime.

Introduction to Anti-Money Laundering

20-WB-403

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

This course provides a background for an effective anti-money laundering (AML) and sanctions program. In particular, it presents the five pillars of the AML Program, industry best practices, and recent enforcement actions.

By the end of this course, participants should be able to:

- recall what money laundering is, including the three stages of money laundering
- identify the AML regulatory landscape and regulatory requirements
- recognize the key elements of an effective AML compliance program
- recall the consequences of noncompliance with AML requirements.

Introduction to Securities Brokers and Dealers

22-WB-020-TR

Field Of Study: Specialized Knowledge

CPE Credits: 4.00

Level of Knowledge: Basic

Find out about securities brokers and dealers, their functions, and how the various regulatory acts affect their activities. This fundamentals course will answer all of your questions and give you a comprehensive view of this key topic.

By the end of this course, participants should be able to:

- identify the business reasons for and the activities of brokers and dealers in securities
- recognize how various regulatory acts affect the activities of broker/dealers
- identify customer accounts, firm trading, and reporting of broker/dealers' operations
- identify the key differences between auditing a broker/dealer and any other commercial enterprise.

Specialized Knowledge

Introduction to the Food and Beverage Industry

22-WB-017-TR

Field Of Study: Specialized Knowledge

CPE Credits: 5.00

Level of Knowledge: Intermediate

This course dives deep into the food and beverage industry. This course is most beneficial to professionals new to the food and beverage industry who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this subject.

By the end of this course, participants should be able to:

- recognize common marketing techniques used by the industry
- identify agencies that regulate food and beverage industries
- determine the new sources of competition in the industry
- associate unique food and beverage company issues with corresponding accounting and auditing standards.

Introduction to the Health Care Industry

23-WB-032-TR

Field Of Study: Specialized Knowledge

CPE Credits: 8.00

Level of Knowledge: Basic

Explore the seven types of health care entities and the accounting and reporting for each type. Learn about the financial statements, identify the various revenue sources and special accounts specific to health care providers, examine the balance sheet and importance of patient receivables and settlement accounts, summarize the guidance and the effects of FASB Accounting Standards Update (ASU) No. 2014-09, Revenue from Contracts with Customers (Topic 606), which provides a framework for addressing revenue recognition issues and preplaces existing revenue recognition guidance in current U.S. generally accepted accounting principles, understand audit considerations, as well as specifics about financial and operational analysis. Describe GASB Statement No. 62, Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements, which directly incorporates into GASB's authoritative literature for governmental entities certain pronouncements issued by FASB and its predecessors on or before November 30, 1989. A set of financial statements and footnotes for Sample Hospital will illustrate the accounting and reporting practices discussed in this course.

This course is most beneficial to professionals new to the health care industry who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this subject.

By the end of this course, participants should be able to:

- discuss an overview of the health care organization
- list characteristics of health care organizations
- identify revenues, expenses, gains, and other support for health care providers
- account and report for health care providers
- account and report for CCRCs and providers of prepaid health care services
- review financial and operational analysis
- identify audit considerations.

Introduction to the Pharmaceutical Industry

23-WB-035-CL

Field Of Study: Specialized Knowledge

CPE Credits: 6.00

Level of Knowledge: Basic

Learn about the pharmaceutical industry, including a general background of the industry, how products are made and approved, and business risks specific to this sector. Also discussed are the manners in which technology and advanced product development methods are changing the way pharmaceuticals are developed. Further, this course presents the peculiarities to planning and conducting the audit of an entity in the pharmaceutical industry followed by tax planning issues.

This basic level course is most beneficial to professionals new to this topic who may be at the staff or entry level in organization but also for a seasoned professional with limited exposure to this topic.

By the end of this course, participants should be able to:

- recognize entities and regulations in the pharmaceutical industries
- identify the FDA regulations and regulations specific to the U.S. as well as from a global perspective
- determine audit planning risk and book-to-tax differences
- recognize audit and tax planning issues for pharmaceutical entities.

The KPMG ESG Academy Pathway: Capital Market, ESG Responsibility and Regulation in the EU **New!**

23-CU-515-EA

Field Of Study: Specialized Knowledge

Level of Knowledge: Overview

This pathway focuses on how regulation impacts capital markets and sustainable finance; the evaluation of sustainability risks; and effective governance for sustainability. In addition, explore how the regulatory environment drives the evolution of nonfinancial reporting.

Courses in this pathway include:

Sustainable Finance and the Role of the Capital Markets in the EU (1.5 hrs)

Sustainability Oriented Risk Management and Corporate Governance (1.8 hrs)

ESG Regulatory Landscape in the EU (1.75 hrs)

By the end of this course, participants should be able to:

- describe sustainable finance and the role of ESG regulations in the EU and the global financial market
- understand the challenges related to ESG data and the role of ESG ratings
- explain how ESG is integrated into investment strategies and how it impacts lending decisions
- explain sustainability risks and how they can be evaluated and managed
- describe the different levels of governance and the impact of effective governance for sustainability
- describe the role of governments in advancing sustainability and what businesses can do about it
- describe the importance of nonfinancial or sustainability reporting and how it evolved
- explain the nonfinancial reporting principles (e.g., materiality) and the tools and regulations that can help to build a report
- understand the potential of sustainability reporting.

Specialized Knowledge

The KPMG ESG Academy Pathway: Capital Market, ESG Responsibility and Regulation in the USA **New!**

23-CU-510-EA

Field Of Study: Specialized Knowledge

Level of Knowledge: Overview

This pathway focuses on how regulation impacts capital markets and sustainable finance; the evaluation of sustainability risks; and effective governance for sustainability. In addition, explore how the regulatory environment drives the evolution of nonfinancial reporting.

Courses in this pathway include:

Sustainable Finance and the Role of the Capital Markets in the USA (1.5 hrs)

Sustainability Oriented Risk Management and Corporate Governance (1.8 hrs)

ESG Regulatory Landscape in the USA (1.75 hrs)

By the end of this course, participants should be able to:

- describe sustainable finance and the role of ESG regulations in the US and the global financial market
- understand the challenges related to ESG data and the role of ESG ratings
- explain how ESG is integrated into investment strategies and how it impacts lending decisions
- explain sustainability risks and how they can be evaluated and managed
- describe the different levels of governance and the impact of effective governance for sustainability
- describe the role of governments in advancing sustainability and what businesses can do about it
- describe the importance of nonfinancial or sustainability reporting and how it evolved
- explain the nonfinancial reporting principles (e.g., materiality) and the tools and regulations that can help to build a report
- understand the potential of sustainability reporting.

The KPMG ESG Academy Pathway: Climate Risk and Decarbonization **New!**

23-CU-520-EA

Field Of Study: Specialized Knowledge

Level of Knowledge: Overview

In this pathway, learn about the different types of climate risks and the role of businesses in decarbonizing the economy.

Courses in this pathway include:

Climate Risks (1.5 hrs)

Corporate Decarbonization Strategies (1.5 hrs)

By the end of this course, participants should be able to:

- describe the different types of climate-related risks
- explain the regulatory and global governance context of climate risks
- describe how to access climate risks using scenario analysis
- describe the role of decarbonization in mitigating climate risks
- explain the importance of decarbonization of our global economies and the role of businesses in this matter
- describe the difference between carbon-neutral and net-zero and the frameworks that exist for such commitments
- describe how to develop a decarbonization plan
- explain the strategic options for corporations to decarbonize.

The KPMG ESG Academy Pathway: Corporate Sustainability Transformation **New!**

23-CU-505-EA

Field Of Study: Specialized Knowledge

Level of Knowledge: Overview

In this pathway, learn how to effectively manage a sustainable transformation, the role of a business case for sustainability, and the factors that make a business model sustainable. Also covered: how a business can transition to a circular economy.

Courses in this pathway include:

Development Towards Corporate Sustainable Management (1.25 hrs)

Transformation Towards Business Models for Sustainability (1.8 hrs)

Transition to a Circular Economy (1.25 hrs)

By the end of this course, participants should be able to:

- describe how corporate strategy and sustainability can be linked and understand the business cases for sustainability
- describe the role of corporate culture and leadership in achieving sustainability
- understand the potential pitfalls while implementing sustainability and how to overcome them
- explain the role business models play in achieving sustainability
- describe the aspects that make a business model sustainable and their key patterns
- analyze business models for sustainability and describe the main challenges to overcome
- explain the key principles of a circular economy
- describe the need to transition to a circular economy
- explain how corporations can innovate to build circular business models.

The KPMG ESG Academy Pathway: State of the Planet and Its People **New!**

23-CU-500-EA

Field Of Study: Specialized Knowledge

Level of Knowledge: Overview

In this pathway, learn about the basic concept of planetary boundaries, the major drivers for change on the state of the planet, consequences of climate change and biodiversity loss, and the options for action we have left to secure a livable future. Also covered: key concepts related to social issues and human rights, as well as how a company operates, particularly for those doing business on a global scale.

Courses in this pathway include:

Natural Science Basics on Climate Change and Biodiversity (1.5 hrs)

Social Issues and Human Rights (2 hrs)

By the end of this course, participants should be able to:

- explain the basic concept of the planetary boundaries and what is happening internationally to try to halt climate change and biodiversity loss
- describe the major drivers for change on the state of the planet
- describe the tipping points in the earth's system
- understand the consequences of climate change and biodiversity loss and the possible scenarios of sustainable development and bioeconomies in the future
- explain the aspects of reporting on the "S" pillar of ESG
- explain the various regulations with which companies must comply
- describe the strategies to address the "people" side of ESG, such as diversity, equity, inclusion, and belonging (DEIB)
- understand the new ways of working in a hybrid working model
- explain the impact on the various stakeholder groups involved in a global supply chain.

Specialized Knowledge

Understanding Greenhouse Gas (GHG) Emissions Scope 1, 2 and 3 23-CU-301

Field Of Study: Specialized Knowledge

CPE Credits: 2.00

Level of Knowledge: Basic

The Understanding Greenhouse Gas (GHG) Emissions – Scopes 1, 2 and 3 curriculum is designed to provide learners with an understanding of GHG emissions, how organizations contribute to climate change and how GHG inventories are developed. This curriculum includes six required microlearning courses and an exam.

By the end of this course, participants should be able to:

- identify the seven main types of GHGs
- identify the three types of anthropogenic (human) activities that lead to GHG emissions
- recall the GHG classifications as published by Greenhouse Gas Protocol (GHGP)
- recognize the four types of scope 1 emissions (mobile, process, stationary and fugitive)
- identify the ways in which organizations produce scope 1 emissions
- identify opportunities for organizations to reduce scope 1 emissions
- list the four forms of scope 2 emissions (electricity, steam, heat and cooling)
- identify the differences between location-based and market-based emissions reporting
- identify the ways in which organizations produce scope 2 emissions
- list opportunities to reduce scope 2 emissions
- recall the 15 categories of scope 3 emissions
- recognize the time boundaries of the 15 categories of scope 3 emissions
- identify the ways in which organizations produce scope 3 emissions
- list opportunities to reduce scope 3 emissions
- list the five principles of GHG accounting and reporting
- identify the steps for creating a GHG inventory
- list the GHG emissions calculation components
- recall how to set GHG emissions targets and monitor GHG emissions data against set targets.

Using Infographics in Accounting Reports **New!**

23-WB-281-CL

Field Of Study: Specialized Knowledge

CPE Credits: 1.00

Level of Knowledge: Basic

Infographics are increasingly being used in business as a tool to present information and data to the intended user in a fast and clear manner. While infographics were traditionally associated with product marketing, they are now being used more widely in other areas of business, including accounting and finance. This course provides a look at how data visualization has evolved through different eras of civilization and is now used as infographics in business and accounting.

By the end of this course, participants should be able to:

- recognize how data visualization has evolved through different eras of civilization and how it is now used as infographics in business
- recognize the trends in how annual reports have been presented over time and how different user groups of accounting and financial data can be reached with infographics
- identify the different tools available to create financial infographic data for annual reports.

Taxes

Controlled Foreign Corporation Qualification

20-WB-0075

Field Of Study: Taxes

CPE Credits: 1.00

Level of Knowledge: Overview

This course covers the basics of Controlled Foreign Corporation (CFC) Qualification.

By the end of this course, participants should be able to:

- recall the different ways a CFC can be subject to federal tax
 - list the criteria for U.S. Shareholder status
 - identify why it matters if you are a U.S. Shareholder
 - define “controlled foreign corporation.”
-

The KPMG ESG Academy Pathway: Capital Market, ESG Responsibility and Regulation in the EU **New!**

23-CU-515-EA

Level of Knowledge: Overview

This pathway focuses on how regulation impacts capital markets and sustainable finance; the evaluation of sustainability risks; and effective governance for sustainability. In addition, explore how the regulatory environment drives the evolution of nonfinancial reporting.

Courses in this pathway include:

Sustainable Finance and the Role of the Capital Markets in the EU (1.5 hrs)

Sustainability Oriented Risk Management and Corporate Governance (1.8 hrs)

ESG Regulatory Landscape in the EU (1.75 hrs)

By the end of this course, participants should be able to:

- describe sustainable finance and the role of ESG regulations in the EU and the global financial market
- understand the challenges related to ESG data and the role of ESG ratings
- explain how ESG is integrated into investment strategies and how it impacts lending decisions
- explain sustainability risks and how they can be evaluated and managed
- describe the different levels of governance and the impact of effective governance for sustainability
- describe the role of governments in advancing sustainability and what businesses can do about it
- describe the importance of nonfinancial or sustainability reporting and how it evolved
- explain the nonfinancial reporting principles (e.g., materiality) and the tools and regulations that can help to build a report
- understand the potential of sustainability reporting.

The KPMG ESG Academy Pathway: Capital Market, ESG Responsibility and Regulation in the USA **New!**

23-CU-510-EA

Level of Knowledge: Overview

This pathway focuses on how regulation impacts capital markets and sustainable finance; the evaluation of sustainability risks; and effective governance for sustainability. In addition, explore how the regulatory environment drives the evolution of nonfinancial reporting.

Courses in this pathway include:

Sustainable Finance and the Role of the Capital Markets in the USA (1.5 hrs)

Sustainability Oriented Risk Management and Corporate Governance (1.8 hrs)

ESG Regulatory Landscape in the USA (1.75 hrs)

By the end of this course, participants should be able to:

- describe sustainable finance and the role of ESG regulations in the US and the global financial market
- understand the challenges related to ESG data and the role of ESG ratings
- explain how ESG is integrated into investment strategies and how it impacts lending decisions
- explain sustainability risks and how they can be evaluated and managed
- describe the different levels of governance and the impact of effective governance for sustainability
- describe the role of governments in advancing sustainability and what businesses can do about it
- describe the importance of nonfinancial or sustainability reporting and how it evolved
- explain the nonfinancial reporting principles (e.g., materiality) and the tools and regulations that can help to build a report
- understand the potential of sustainability reporting.

The KPMG ESG Academy Pathway: Climate Risk and Decarbonization **New!**

23-CU-520-EA

Level of Knowledge: Overview

In this pathway, learn about the different types of climate risks and the role of businesses in decarbonizing the economy.

Courses in this pathway include:

Climate Risks (1.5 hrs)

Corporate Decarbonization Strategies (1.5 hrs)

By the end of this course, participants should be able to:

- describe the different types of climate-related risks
- explain the regulatory and global governance context of climate risks
- describe how to access climate risks using scenario analysis
- describe the role of decarbonization in mitigating climate risks
- explain the importance of decarbonization of our global economies and the role of businesses in this matter
- describe the difference between carbon-neutral and net-zero and the frameworks that exist for such commitments
- describe how to develop a decarbonization plan
- explain the strategic options for corporations to decarbonize.

The KPMG ESG Academy Pathway: Corporate Sustainability Transformation **New!**

23-CU-505-EA

Level of Knowledge: Overview

In this pathway, learn how to effectively manage a sustainable transformation, the role of a business case for sustainability, and the factors that make a business model sustainable. Also covered: how a business can transition to a circular economy.

Courses in this pathway include:

Development Towards Corporate Sustainable Management (1.25 hrs)

Transformation Towards Business Models for Sustainability (1.8 hrs)

Transition to a Circular Economy (1.25 hrs)

By the end of this course, participants should be able to:

- describe how corporate strategy and sustainability can be linked and understand the business cases for sustainability
- describe the role of corporate culture and leadership in achieving sustainability
- understand the potential pitfalls while implementing sustainability and how to overcome them
- explain the role business models play in achieving sustainability
- describe the aspects that make a business model sustainable and their key patterns
- analyze business models for sustainability and describe the main challenges to overcome
- explain the key principles of a circular economy
- describe the need to transition to a circular economy
- explain how corporations can innovate to build circular business models.

The KPMG ESG Academy Pathway: State of the Planet and Its People

New!

23-CU-500-EA

[Level of Knowledge: Overview](#)

In this pathway, learn about the basic concept of planetary boundaries, the major drivers for change on the state of the planet, consequences of climate change and biodiversity loss, and the options for action we have left to secure a livable future. Also covered: key concepts related to social issues and human rights, as well as how a company operates, particularly for those doing business on a global scale.

Courses in this pathway include:

Natural Science Basics on Climate Change and Biodiversity (1.5 hrs)

Social Issues and Human Rights (2 hrs)

By the end of this course, participants should be able to:

- explain the basic concept of the planetary boundaries and what is happening internationally to try to halt climate change and biodiversity loss
 - describe the major drivers for change on the state of the planet
 - describe the tipping points in the earth's system
 - understand the consequences of climate change and biodiversity loss and the possible scenarios of sustainable development and bio-economies in the future
 - explain the aspects of reporting on the “S” pillar of ESG
 - explain the various regulations with which companies must comply
 - describe the strategies to address the “people” side of ESG, such as diversity, equity, inclusion, and belonging (DEIB)
 - understand the new ways of working in a hybrid working model
 - explain the impact on the various stakeholder groups involved in a global supply chain.
-
